Nature Publishing Group is proud to introduce *Scientific American*'s online archive for institutional customers on nature.com at **www.nature.com/scientificamerican/archive**. The *Scientific American* online archive contains the complete collection of *Scientific American* from May 1948 to December 2005.

The second half of the twentieth century bore witness to revolutionary developments in science and technology that have shaped the world we live in today. Containing over 650 issues and more than 20,000 articles, the *Scientific American* online archive offers readers an insight into social and scientific trends throughout this period. Online users can search through every issue of *Scientific American* back to May 1948.

Scientific American's online archive reveals a wealth of treasure from the magazine's history. Gems include a 1954 article prophetically entitled "Computers in Business," the landmark 1988 single-topic issue "What Science Knows About AIDS" featuring contributors Robert C. Gallo and Luc Montagnier, the co-discoverers of HIV, and policy pieces including the 1990 Al Gore essay, "A New Initiative to Save the Planet."

Site license access to *Scientific American*'s online archive can be purchased as two collections: *Scientific American* archive: 1948-1992 (528 issues and approximately 15,640 articles) and *Scientific American* archive: 1993-2005 (156 issues and approximately 4,680 articles). Collections contain content from *Scientific American*, *Scientific American Mind* beginning with its premier issue in January 2004, plus all Special Issues. The articles are available as PDFs.

The introduction of the archive follows the 2009 launch of *Scientific American* site license access on nature.com. The *Scientific American* archive is an integrated part of the nature.com platform. All users can browse the online archive via **www.nature.com/scientificamerican/archive/index.html**. The archive is searchable by keyword, author, article title or DOI for refined results. Alternatively, users can also browse by year and issue.

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific and medical information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences and clinical medicine.

Focusing on the needs of scientists, ***Nature*** (founded in 1869) is the leading weekly, international scientific journal. In addition, for this audience, NPG publishes a range of *Nature* research journals and *Nature Reviews* journals, plus a range of prestigious academic journals including society-owned publications. Online, nature.com provides over 5 million visitors per month with access to NPG publications and online databases and services, including *Nature News* and *Nature Jobs* plus access to *Nature Network* and Nature Education's **Scitable.com.**

Scientific American is at the heart of NPG's newly-formed consumer media division, meeting the needs of the general public. Founded in 1845, ***Scientific American*** is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 16 local language editions around the world it reaches over 3 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany.

Throughout all its businesses NPG is dedicated to serving the scientific and medical communities and the wider scientifically interested general public. Part of Macmillan Publishers Limited, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, Buenos Aires, Delhi, Hong Kong, Madrid, Barcelona, Munich, Heidelberg, Basingstoke, Melbourne, Paris, San Francisco, Seoul and Washington DC.
