Nature Publishing Group is proud to offer institutional customers the latest *Scientific American* archive collection for years January 1910 - December 1947 on nature.com at **www.nature.com/scientificamerican/archive**. This collection brings together 38 years of historic advancements in science, technology and medicine. With this new archive installment, online users can now access every issue of *Scientific American* back to January 1910—over 100 years of content.

The 1910-1947 collection contains more than 38,300 articles and highlights significant discoveries and developments including the inventions of a blood pressure meter and fluorescent lamps.

Scientific American's online archive reveals a wealth of treasure from the magazine's history. Gems include a 1932 article called "And Now the Neutron," the 1954 article prophetically entitled "Computers in Business," the landmark 1988 single-topic issue "What Science Knows About AIDS" featuring contributors Robert C. Gallo and Luc Montagnier, the co-discoverers of HIV, and policy pieces including the 1990 Al Gore essay, "A New Initiative to Save the Planet."

Site license access to *Scientific American*'s online archive can be purchased as three collections: *Scientific American* archive: 1910- 1947 (approximately 38,300 articles), *Scientific American* archive 1948-1992 (approximately 15,800 articles) and *Scientific American* archive: 1993-2005 (approximately 4,680 articles). Collections contain content from *Scientific American*, *Scientific American Mind* beginning with its premier issue in January 2004, plus all Special Issues. The articles are available as PDFs.

The *Scientific American* archive is an integrated part of the nature.com platform. All users can browse the online archive via **www.nature.com/scientificamerican/archive/index.html**. The archive is searchable by keyword, author, article title or DOI for refined results. Alternatively, users can also browse by year and issue.

Site license access to *Scientific American* available on nature.com (press release 28 October 2009)

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific and medical information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences and clinical medicine.

Focusing on the needs of scientists, *Nature* (founded in 1869) is the leading weekly, international scientific journal. In addition, for this audience, NPG publishes a range of *Nature* research journals and *Nature Reviews* journals, plus a range of prestigious academic journals including society-owned publications. Online, nature.com provides over 5 million visitors per month with access to NPG publications and online databases and services, including *Nature News* and *NatureJobs* plus access to *Nature Network* and Nature Education's Scitable.com.

Scientific American is at the heart of Nature Publishing Group's consumer media division, meeting the needs of the general public. Founded in 1845, *Scientific American* is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 14 local language editions around the world it reaches more than 5 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany. For more information, please visit www.scientificamerican.com.

Throughout all its businesses NPG is dedicated to serving the scientific and medical communities and the wider scientifically interested general public. Part of Macmillan Publishers Limited, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, Buenos Aires, Cairo, Delhi, Mumbai, Hong Kong, Madrid, Barcelona, Munich, Heidelberg, Basingstoke, Melbourne, Paris, San Francisco, Seoul and Washington DC. For more information, please go to **www.nature.com.**
