

## Service and support you can trust

When you have invested in high-quality dental equipment, investing in reliable service and support is a must to ensure

a fully compliant and efficient practice, particularly in the event of a breakdown. Eschmann Care & Cover provides expert service and support for your Eschmann dental decontamination equipment, helping to ensure full compliance with HTM01-05 and SDCEP guidance.

With no hidden charges, Eschmann Care & Cover includes Manufacturer's Annual Validation and Pressure Vessel Certification (PSSR), unlimited breakdown cover (including call-outs, parts and labour), as well as annual Enhanced CPD User Training for staff. With a team of over 50 engineers nationwide exclusively working on Eschmann decontamination equipment, we are able to fix over 91% of breakdowns on our first visit. Technical telephone support is also available with many issues fixed without an engineer needing to attend. Exclusive access to Eschmann spare parts is included in our Care & Cover service packages, so we can ensure that your practice is up and running with minimal downtime.

For information on Eschmann's highly effective and affordable range of decontamination equipment and products, and further details about Eschmann Care & Cover visit [www.eschmann.co.uk](http://www.eschmann.co.uk) or call 01903 753322.

## Managing diabetic burnout with collaborative care

PREVENT GEL from TANDEX, used with their range of FLEXI interdental brushes, is a great product to recommend to patients with additional oral care needs due to diabetes. Increased risk of periodontal disease makes interdental cleaning an important part of daily oral care.<sup>1</sup>

Not only does TANDEX have the right tools to maximise oral health for people with diabetes, they have helpful FLEXI Educator tools to assist patients in understanding the need for interdental care.

PREVENT GEL from TANDEX includes many of the minerals and enzymes diabetic patients need due to impaired saliva production. FLEXI interdental brushes are easy to use and effective, making a great choice for sustainable, ethical care with all the comfort, affordability and convenience patients need.

Find out more about how PREVENT GEL from TANDEX, used with their range of FLEXI interdental brushes can benefit patients.

For more information on Tandex's range of products visit <https://tandex.dk/>. Products are also available from CTS Dental Supplies via: [www.cts-dental.com/](http://www.cts-dental.com/).

## Double duty

Reliable adhesion is a prerequisite of any dental restoration.<sup>1</sup> If the wrong adhesive is chosen, then the treatment may fail or result in a poor aesthetic outcome.

SUPERKRAFT from COLTENE offers the reliability dental professionals and their patients demand. SUPERKRAFT consists of SoloCem universal dental cement and ONE COAT 7 UNIVERSAL bond which, when used in combination, create dependable and solid adhesive strength for indirect restorations.

Dental clinicians can use the materials separately, or as a duo for maximum versatility. The SoloCem cement provides

colour stability and optimal integration, and ONE COAT 7 UNIVERSAL offers strong bonding on different surfaces.

For more information contact [info.uk@coltene.com](mailto:info.uk@coltene.com) and 0800 254 5115.
