The International Bone and Mineral Society (IBMS) and Nature Publishing Group (NPG) are pleased to announce a new publishing partnership. NPG will publish *IBMS BoneKEy*®, an online knowledge resource about metabolic bone disorders such as osteoporosis, on behalf of IBMS from 2012. The *IBMS BoneKEy*® website (**www.bonekey.org**) will be relaunched in January.

"IBMS and NPG share a common vision of community development around expert scientific content. NPG's expertise in premier scientific publishing is well known, and so is the success of IBMS in developing the leading online knowledge environment in bone and bone-related sciences. This joint venture is a true example of the whole being larger than the sum of its parts. We intend to provide our members, our affiliate societies and the scientific community at large, including our partners in industry, with a valuable online platform for scientific exchange and community growth" said Henry Kronenberg, acting President of IBMS."

IBMS BoneKEy® is dedicated to fostering progress in understanding the causes of metabolic bone disorders and their clinical care. Each month, *IBMS BoneKEy*® publishes original articles written by eminent scientists and physicians including perspectives, commentaries and meeting reports. It also offers online forums, a directory, job postings and other services. Launched in 2001, *IBMS BoneKEy*® is provided as a free service by the IBMS, supported by sponsorship. It serves as a central repository of knowledge in the fields of bone, cartilage, and mineral metabolism and acts as a meeting place for a growing community of more than 12,000 registered members. *IBMS BoneKEy*® is currently hosted by Highwire Press.

Anna Salt, Publisher, Pharma Solutions at NPG said, "We are delighted to partner with the IBMS, who share our commitment to providing the best quality information to the communities we serve." Martin Delahunty, Associate Director at NPG added, "We look forward to bringing NPG's strengths, including editorial expertise and hosting, to continue to develop *IBMS BoneKEy*® and other excellent bone and mineral metabolism information resources."

Nature Publishing Group works with more than 34 societies and organizations worldwide to provide publishing services and publishes 50 journals in its academic and society journals program.

IBMS is an international organization that facilitates the generation and dissemination of knowledge of bone and mineral metabolism through multi-disciplinary meetings, communication, community, and training, throughout the world.

-ENDS-

About International Bone and Mineral Society

The International Bone and Mineral Society (IBMS) is a dynamic international membership organization and network of researchers, clinicians, companies and societies that is dedicated to promoting bone health through international collaboration. Established in 1960 (as the Parathyroid Conferences), IBMS has evolved into the hub for communication, meetings, and the exchange of ideas globally and is now poised to further align its programs with the expanding remit of the international bone community to improve bone research and science and bone health in the world's population. For more information please go to **www.ibmsonline.org** and **www.bonekey.org**.

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific and medical information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences and clinical medicine.

Focusing on the needs of scientists, *Nature* (founded in 1869) is the leading weekly, international scientific journal. In addition, for this audience, NPG publishes a range of *Nature* research journals and *Nature Reviews* journals, plus a range of prestigious academic journals including society-owned publications. Online, nature.com provides over 5 million visitors per

month with access to NPG publications and online databases and services, including *Nature News* and *NatureJobs* plus access to *Nature Network* and Nature Education's Scitable.com.

Scientific American is at the heart of Nature Publishing Group's consumer media division, meeting the needs of the general public. Founded in 1845, *Scientific American* is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 14 local language editions around the world it reaches more than 5 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany. For more information, please visit www.scientificamerican.com.

Throughout all its businesses NPG is dedicated to serving the scientific and medical communities and the wider scientifically interested general public. Part of Macmillan Publishers Limited, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, Buenos Aires, Cairo, Delhi, Mumbai, Hong Kong, Madrid, Barcelona, Munich, Heidelberg, Basingstoke, Melbourne, Paris, San Francisco, Seoul and Washington DC. For more information, please go to **www.nature.com.**
