Nature Publishing Group (NPG) is inviting submissions for *Experimental & Molecular Medicine (EMM)* following its publishing partnership with the Korean Society for Biochemistry and Molecular Biology (KSBMB). NPG will co-publish *EMM*, South Korea's highest ranked journal, on nature.com from January 2013. Submissions can now be made at **www.nature.com/emm**.

EMM publishes original research papers and reviews on genetic, molecular and cellular studies of human physiology and diseases. Research areas include cancer biology; immunology; neuroscience; cardiovascular biology; metabolic diseases; genetics and genomics; gene therapy; and stem cells and regenerative medicine. The journal seeks to highlight the improved clinical benefits for human health from experimental and translational research performed using specific molecular tools.

The international editorial board is led by Editor-in-Chief Professor Dae-Myung Jue, of the Catholic University of Korea, Seoul. With the move to NPG, content will be published as open access, freely available to researchers worldwide. An article-processing charge (APC) will be levied per article accepted for publication, and authors have a choice of two Creative Commons licenses.

"We are pleased to have partnered with NPG and look forward to publishing *EMM* on the renowned nature.com platform," said Professor Dae-Myung Jue. "We hope to develop our journal within the community by sharing the latest developments in experimental and medical research to a wider global audience."

"We are delighted to have signed our first publishing partnership in Korea," said Dugald McGlashan, Publisher of NPG's Asia-Pacific Academic Journals. "We look forward to receiving our first manuscript submissions through nature.com and are working closely with the KSBMB to ensure a successful transition to nature.com in 2013."

NPG publishes 60 journals that have either an open access option or are entirely open access. 58 of its 62 academic and society publications (94%) have introduced open access options or are open access journals. A **full list of open access titles** that NPG publishes is available on nature.com.

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific and medical information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences and clinical medicine.

Focusing on the needs of scientists, *Nature* (founded in 1869) is the leading weekly, international scientific journal. In addition, for this audience, NPG publishes a range of *Nature* research journals and *Nature Reviews* journals, plus a range of prestigious academic journals including society-owned publications. Online, nature.com provides over 6 million visitors per month with access to NPG publications and online databases and services, including news and comment from *Nature*, *Naturejobs* plus access to *Nature Network* and Nature Education's Scitable.com.

Scientific American is at the heart of NPG's consumer media division, meeting the needs of the general public. Founded in 1845, *Scientific American* is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 14 local language editions around the world it reaches over 5 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany.

Throughout all its businesses NPG is dedicated to serving the scientific and medical communities and the wider scientifically interested general public. Part of Macmillan Publishers Limited, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, San Francisco, Washington DC, Buenos Aires, Mexico City, Sao Paulo, Cairo, Dubai, Delhi, Mumbai, Hong Kong, Shanghai, Melbourne, Osaka, Seoul, Barcelona, Madrid, Basingstoke, Heidelberg, Munich and Paris.
