therapeutic agents by their accepted generic or chemical name, and do not abbreviate them (a proprietary name may be given only with the first use of the generic name). Trade names of drugs should be capitalized and placed in parentheses after the name of the drug. Names and locations (city and state in United States; city and country outside the United States) of manufacturers of drugs, supplies, or equipment cited in an article should be provided in parentheses.

Abbreviations: Abbreviations should be defined at the first mention in the text and in each table and figure. Write out the full term for each abbreviation at its first use unless it is a standard unit of measure.

Units: All measurements should be given in metric units.

Reprinted material: If a table, figure, or any other previously published material is included, the authors must obtain written permission to reproduce the material in both print and electronic formats from the copyright owner. The original source should be cited.

References: All references (published and in press) should be numbered consecutively and listed in the order in which they are referred to in the text of the manuscript. (Unpublished sources such as “personal communication” and manuscripts “in preparation” should not appear in the reference list; instead, cite them in the text in parentheses.) The references should be typed double-spaced, and abbreviations of journal titles must conform to those used in Index Medicus of the National Library of Medicine. The format should conform to the examples listed below.

An article with three or fewer authors:

An article with more than three authors:

A book:

A chapter in a book:

Tables: Number tables consecutively with arabic numerals (1, 2, etc.). Each table should have a brief title (put explanatory information in a footnote, not in the title) and be self-explanatory; the table should not merely duplicate the text. The text should be logical and well organized so that it can be used to compare or classify related items. Tables should be typed double-spaced, including headings, on a standard size of paper (8.5 x 11 inches or A4). If a table must be continued, use a second page and repeat the column headings. Tables should be simple, with only one figure or table on each page. Figures should be simple, with no more than four figures or tables per page. All tables should be placed as close to the text as possible, and not at the end of the manuscript.

Figures: Please submit production-quality artwork with your initial submission. Detailed guidelines for submitting artwork can be found at http://www.nature.com/aj/artworkguidelines.pdf. To avoid size reduction, crop out unnecessary areas and submit artwork sized to fit one column (87.5 mm) or, if necessary, two columns (180 mm). Most figures should be presented at one-column width. For labels, use a sans-serif font, preferably 8-point Helvetica or Arial. Figure parts should be labeled a, b, c, etc. For more on labeling, see the artwork guidelines. Figure legends should be submitted in a list at the end of the manuscript. Each legend should begin with a brief, overall description of the figure before going on to identify parts (a, b, c, etc.). Indicate the meaning of all symbols, keys, and abbreviations used in the figure. If the figure is being reprinted from another source, include the credit line in the legend.

INVESTIGATIONS INVOLVING HUMAN SUBJECTS: All papers on clinical research that involves human subjects must be accompanied by evidence of Institutional Review Board or Ethics Committee Review. The date the project was approved, when available, should be included in the text of the paper.

CONFLICT OF INTEREST/STUDY SUPPORT: Following the references, all articles must include a section with the following headings:

Guarantor of the article: Identify the author who is accepting full responsibility for the conduct of the study. He or she must have had access to the data and have control of the decision to publish.

Specific author contributions: List the role played by each author, e.g., in planning and/or conducting the study, collecting and/or interpreting data, and/or drafting the manuscript. For each author, there should also be a statement that he or she has approved the final draft submitted.

Financial support: Disclose funding sources for the publication. Describe the role of any study sponsors in the study design, collection, analysis, and interpretation of the data and in the writing of the report. If there was funding but the work was independent of it, this must be specifically stated. (Other types of assistance—i.e., non-financial—may be acknowledged in an Acknowledgments section in the text.)

Potential competing interests: list all potential conflicts or state “None.”

SUPPLEMENTARY MATERIAL

Supplementary material is peer-reviewed material directly relevant to the conclusion of an article that cannot be included in the printed version owing to space or format constraints. It is posted on the journal’s website and linked to the article when the article is published and may include data files, graphics, videos, or extensive tables. Video clips are particularly encouraged. Refer to each item in the text, e.g., “See Supplementary Figure 1 online.”

Supplementary material must be supplied to the editorial office in its final form for peer review. On acceptance, the final version of the peer-reviewed supplementary material should be submitted with the accepted paper. To ensure that the contents of the supplementary material files can be viewed by the editor(s), referees, and readers, please also submit a “read-me” file containing brief instructions on how to use the file.

SUPPLYING SUPPLEMENTARY MATERIAL FILES: Authors should ensure that supplementary information is supplied in its final format because it is not copyrighted and will appear online exactly as originally submitted. It cannot be altered, nor new supplementary material added, after the paper has been accepted for publication. Please supply the supplementary information through the electronic manuscript submission and tracking system, in an acceptable file format (see below). Include a text file containing a summary (no more than 50 words) to describe the contents of each file, e.g., “Supplementary Video 1 Gut motility markedly altered after acute T. spiralis infection.” and identify the types of files (file formats) submitted.

Accepted file formats. QuickTime files (.mov), Flash movies (.swf), MPEG movie files (.mpg), graphical image files (.gif), HTML files (.html), JPEG image files (.jpg), sound files (.wav), plain ASCII text (.txt), Acrobat files (.pdf), MS Word documents (.doc), Postscript files (.ps), MS Excel spreadsheet documents (.xls), and PowerPoint files (.ppt). We cannot accept TeX and LaTeX. Files must be as small as possible, so that they can be downloaded quickly. Images should not exceed 640 x 480 pixels (but we recommend 480 x 360 pixels as the maximum frame size for movies. We also recommend a frame rate of 15 frames per second. The files should be tested for playback before submission, preferably on a computer not used for its creation, to check for compatibility issues. If applicable to the presentation of the supplementary information, use a 256-color palette. Consider the use of lower specification for all of these points if the supplementary information can still be represented clearly. Our recommended maximum data rate is 150 KB/s. The number of files should be limited to eight, and the total file size should not exceed 8 MB (10MB for videos).

PROOFS: An e-mail will be sent to the corresponding author with a URL link from which proofs can be collected. Proofs must be returned by fax within 48 hours of receipt. Failure to do so may result in a delay to publication. Extensive corrections cannot be made at this stage.

OFFPRINTS: Offprints may be ordered using the form accompanying the proof.

MANUSCRIPT DEPOSITION: Several funding bodies and institutions have introduced mandates that require authors to self-archive articles in publicly accessible archives. Authors are responsible for depositing the accepted version of their manuscript according to the guidelines established by their funder.
