Supplementary Figure 2 Cre-induced recombination between integrated proviruses. Southern blot analyses of DNA extracted from different ES cell clones, infected sequentially with viruses A1 and S1 and electroporated with plasmids corresponding to virus A1 and S1 respectively.

Legend and abbreviations as for viruses A1 and S1 and electroporated with plasmids pA1 and pS1.

Families: A1-S1 (3.0 kb)
A1 (3.4 kb)
S1 (2.9 kb)

Fig. 1. pA1 and pS1, plasmid corresponding to virus A1 and S1 respectively.
