

## CORRIGENDUM

***HOX* gene clusters are hotspots of *de novo* methylation in CpG islands of human lung adenocarcinomas**

Masahiko Shiraishi, Azumi Sekiguchi, Adam J Oates, Michael J Terry and Yuji Miyamoto

doi:10.1038/sj.onc.1205717

**Correction to:** *Oncogene* (2002) **21**, 3659–3662.  
doi:10.1038/sj.onc.1205453

The authors wish to apologise for an error found in Table 1. Positions of putative CpG island and those of corresponding *Tsp509* I fragment of the *HOXA7* gene are 29 353–30 318 and 29 567–29 916, respectively.
