A new angle from 3M

3M Unitek are pleased to announce the launch of the new AlastiK Easy-to-Tie Ligatures. 3M Unitek claims if placing elastomeric modules causes dentists problems then the AlastiK Easy-to-Tie Ligatures are the solution.

Designed with a forty-five degree bend, 3M Unitek claims AlastiK makes bracket ligation hook up easier and more efficient than before.

Their angled shape reduces the amount of movement needed for bracket ligation improving the process for the clinician.

For more information or a free sample phone the 3M Unitek team on 01274 392222.

The new SATInfloss

Oral-B is re-launching SATInfloss with new packaging. SATInfloss is an advanced technology floss manufactured from a dual component fibre that combines a strong nylon core with a polymer sheath.

Oral-B claims the nylon core gives the floss strength and makes it resistant to breakage, whilst the polymer sheath

allows it to glide between even the tightest interdental spaces.

If you would like to place an order contact your local representative or one of the national dental wholesalers.
