A new mask from CCI

Charcoal Cloth International (CCI) have recently launched a new disposable mask called the M1 mercury face mask. They claim it gives dental professionals protection against mercury vapour. Comfortable to wear, the mask has an adjustable nose-bridge allowing it to fit any size or shape of face.

The M1 Mercury face mask incorporates a special version of zorflex activated charcoal cloth which CCI claims adsorbs mercury and other organic vapours which dental professionals come into contact with. CCI claims the layer of zorflex has a highly adsorbent microporous internal surface area of 3600m².

The new AdheSe

Ivoclar Vivadent has launched a new self-etching adhesive, which they claim will revolutionise clinical procedures as it makes separate etching unnecessary.

AdheSE is a new self-etching enamel and dentine adhesive for direct light-curing composite, ceromer and compomer restorations.

Free samples of AdheSE are available by contacting Ivoclar Vivadent on 0116 265 4055. **Reader response number 53**

How Steriblue is your range of consumables?

Cardozo is pleased to announce the UK launch of the new Steriblue range of dental consumables. Cardozo claims the products have been designed by dentists, for dentists with the focus on excellent quality, reliability, convenience and ease of use.

The range includes Blueroll, 100% pure cotton wool rolls which Cardozo also claim have superior absorption capacity to standard rolls. The rolls do not shed fluff or lose shape and are chlorine free. Blueroll are available in 3 sizes (1 small, 2 standard & 3 large) in handy 300g packs.

Steriblue have 3 different styles of face mask available including Blueshield which is a high filtration mask (99.6% at 3.1u) incorporating a plastic anti-fog visor for full face protection. For more information phone 01494 773010.

Fancy a free bottle of the new Autorinse?

Topdental is pleased to announce the launch of two solutions which they have developed to help aspirator cleaning. Topdental claims the solutions will help dentists in the removal of protein build up in a patient's suction system.

Topdental also claims normal Alkaline based cleaners will not be as effective on a daily basis against this protein build up. Autorinse has been developed to use as a weekly (green) solution and a daily (blue) solution.

Topdental is offering a free 1 litre dispenser bottle of Autorinse with both the daily and the weekly 5 litre refill.

For more information telephone on 0800 132 373.
