Efficient gene delivery in differentiated human embryonic stem cells.

Exp Mol Med 2005;37:36-44

The authors would like to amend a reference (Lee *et al.*, 2003) that was cited in “Cell culture” section of “Materials and Methods”. Instead of “(Lee *et al.*, 2003)”, we would like to change the reference to “(Kim *et al.*, 2003)”. In “References”, it also needs to include the following reference.

Kim YY, Seol HW, Ahn HJ. Temporal expression of differentiation markers in embryoid bodies from various human embryonic stem cell line. International Society for Stem Cell Research 1st Annual Meeting, Washington, DC. U.S.A. June 8-11, 2003, Abstract No. 35.

The authors apologize for any inconvenience.
