\*It may come as no surprise that these two individuals were "super sponsors" this year. Dr Bruce Korf sponsored no fewer than 10 applicants, and Dr Charles Epstein came in second with 5 sponsorships!

#Vickie L. Venne, MS, not only sponsored two individuals this year, but wrote the most compelling and enthusiastic letters of support. It is wonderful to hear about the unique qualities of our applicants and the letters of support *are* carefully reviewed.

## Position Available

The Dr. John T. Macdonald Foundation Center for Medical Genetics at the University of Miami School of Medicine seeks an outstanding Cytogenetics Laboratory Director to join the faculty of the University of Miami and become a member of the "Miami Gene Team". The University of Miami is developing a multidisciplinary center for research, education, and service programs in medical genetics. The successful candidate for the Director of the Cytogenetics Laboratory must have a Ph.D. or M.D./Ph.D., board certification in Clinical Cytogenetics, and be eligible for a Florida Clinical Cytogenetics Director license.

Responsibilities include the management of a full-service cytogenetics diagnostic laboratory; the development of emerging technologies in cytogenetics; and the supervision of ABMG postdoctoral trainees. The Cytogenetics Laboratory Director will have ample opportunity to collaborate in fundamental and clinical research projects. We serve an area that is culturally and ethnically diverse and service approximately one-third of South Florida. Salary and level of faculty appointment will be commensurate with background and experience.

Interested candidates should submit a letter indicating interest and expectations, curriculum vitae, and three references to Dr. Louis J. Elsas or Dr. Herbert A. Lubs at the University of Miami School of Medicine, Department of Pediatrics, Center for Medical Genetics, P.O. Box 016820 (D820), Miami, FL 33101; or fax to 305-243-7254; or email to [LElsas@med.miami.edu](mailto:LElsas@med.miami.edu).

The University of Miami is an Equal Opportunity/Affirmative Action Employer
