

ERRATUM: Clinical genetics evaluation in identifying the etiology of autism spectrum disorders: 2013 guideline revisions

G. Bradley Schaefer, MD and Nancy J. Mendelsohn, MD; for the Professional Practice and Guidelines Committee

Genet Med advance online publication, 21 March 2013; doi:[10.1038/gim.2013.32](https://doi.org/10.1038/gim.2013.32)

In the Summary of the originally published version of this article, it was stated that “Advances in clinical testing technology have increased the diagnostic yield from 6–10% a few years ago to 30–90%.” The correct current diagnostic yield is 30–40%. Moreover, **Table 5** was adapted from ref. 74, not 72. The publisher regrets these errors.
