

INDEX

- Adam, O. B., 385
 age of mating, 142
 of parent, 233
 agouti, 196, 229
 antigens, 205
Antirrhinum, 384
Armadillium, 383
Aspergillus, 385
 assay, chromosomes, 22, 137
Avena sativa, 383
- Back cross, 225
 selection, 45
 bacterial infection, 264
 bacteria, nodule, 263
 Bailey, N. T. J., 220, 376
 Baker, H. G., 128
 balance, 3
 barriers to mating, 70
 Bateman, A. J., 48, 127
 Beatty, R. A., 378
 Berge, S., 195
 Bertinshaw, D., 385
 Bevan, E. A., 129, 378
 Bhat, N. R., 243
 Billingham, R. E., 129
 biology, Soviet, 252
 biometry, 375
 blackberry, 99
 Blackwood, M., 379
 blood cells, 333
 groups, 21, 385
 distribution of RH and MN, 122
 multiplicity in man, 121
 and speech, 121
Bombardia, 384
 bridge univalent, 183
 bristle; *see* chaetæ
- Callan, H. G., 129, 357, 378
 cancer, 249
 Carr, J. G., 262
 Carter, T. C., 378, 379
 Caspersson, 330
 cattle, 195
 Catcheside, D. G., 379
 cell-wall formations, 191
 centromere, 52, 53
 breakage, 307
 chaetæ, 7, 55, 147
 chaetomium, 109
 Chakravarty, A. K., 381
 character, correlated, 131
 chi-squared, 215
- chiasma cycle, 305
 interference, breakdown, 129
 localised, 188
 obligatory, 358
 chiasmata, 166, 224
 chimæra, 87
Chironomus, 64
 chromosome assays, 22, 137
 breakage, 164, 295, 310
 mammalian, 386
 maps, 53
 numbers, 369
 pairing, 101, 154
 regions, sensitivity of, 380
 salivary, 154
 set, 105
 staining, 333
 clover, 263
 white, 381
 Cock, A. G., 262
 competition, mating, 48
Coprinus, 384
 correction term, 56
 correlated response, 155
 covariants, 217
 Crane, M. B., 85, 99, 253
 crop improvement, 122
 Crosby, J. L., 127
 crossbreeding in livestock, 124
 crossing over, 4, 163, 294, 351
 inversions, 325
 map, 64
 suppression, 106
Culex, 357
 cultivated plants, population, 127
 cyanogenesis, 381
 cytoplasmic genes, 250
 inheritance, 95, 263
- Darlington, C. D., 103, 121, 159, 163, 323
 Darwin, 258
 Darwinism, 156
 death rate, 77
 Demerec, 250
 delayed response, 49
 dermal ridge, 382
 development, abnormal, 133
 dicentric chromatid, 163
Didymium, 377
 differentiation, 319
 diplotene, 171
Diptera, 131
 disease resistance, 93
 distribution, bimodal, 72

- Dobie, D. L., 109
 Dobzhansky, Th., 294, 313
 dominance, 158
 Donald, H. P., 124
 Dowdeswell, W. H., 67
Drosophila melanogaster, 5, 53, 386
 body size, 386
 subobscura, 382
 Dunn, 243

 ecological barrier, 67
Eleusine, 372
 elimination, selective, 284
 embryo-sac, 285
Eragrostis, 371
 error estimates, 9
 variants, 58
 evolution, 313
 expressivity, 262
 eye abnormalities, 154

 factors, effective, 39, 155
 Falconer, D. S., 379, 380
 fertility, 8, 44, 156
 fluctuations, 17
 Fishberg, M., 378, 380
 Fisher, R. A., 123, 140, 211, 215, 229, 377, 380
 fitness, 156
 Forbes, E., 385
 Ford, C. E., 380
 Ford, E. B., 67, 252, 380
 Ford, J. M., 109
 fowl, 262
 fragment, acentric, 167, 191
 Frankel, O. H., 163, 293
 Fraser-Roberts, J. A., 121
 fruit flavour, 93
 shape, 89
 fungi, 109
 Fyfe, J. L., 381

 Galton, F., 375
 Geitler, L., 319
 gene exhibition, 262
 interaction, 23
 genes, adjacent, 130
 markers, 22, 55
 recessive, 278
 genetics, human, 212
 Godward, M. B. E., 381
 gonodotropic hormone, response, 262
 Gordon, C., 262
 grafting, 253, 273
 grasses, 369
 Grüneberg, H., 262, 381

 Hadorn, E., 131
 hæmolytic disease, 122
 hair colour, 195
 Haldane, J. B. S., 382
 Håkansson, A., 293
 Harris, H., 382

 Harrison, B. J., 1, 131, 384
 Hartshorne, J. N., 379
 Haskell, G. M. L., 5, 123, 382
 heterochromatin, 64
 heterokaryons, 385
 heterosis, 138
 Holt, H., 385
 Holt, S. B., 382
 homogeneity, 58
 homothallic ascomycete, 385
 Howard, A., 383
 Howard, H. W., 383
 human blood groups, 385
 Hurcombe, R., 369
 Hurst, R., 383
 hybrid corn, 123
 newt, 380
 hybridisation, vegetative, 253
 hybrid vigour, utilisation, 125
 Hydén, 323

 ichthyotic mice, 379
 inbred lines, 384
 inbreeding, 267
 in livestock, 124
 theory of, 123
 incompatibility, 339
 gene, 87
 inheritance non-mendelian, 286
 intensity, radiation, 109, 115
 interaction, chromosomes, 25, 137
 interference, 357
 interfertile species, 128
 interlocking, 172
 interspecific hybridisation, 128
 intrapopulation heterogeneity, 127
 inversions, 54, 163
 irradiation effect, 332
 island population, 69
 isolation, geographical, 70
 isochromosomes, 305

 Jørgensen, 253

 Kalmus, H., 382
 Kemp, T., 251
 Kew Gardens, 369
 Koller, P. C., 323

 La Cour, L. F., 319
 lateral asymmetry, 262
 latin square, 215
 Lawler, S., 383, 385
 leaf glands, 87
Lebistes, 5
 Leguminosæ, 263
 Lepidoptera, 67
 lethal combinations, 105
 Lewis, D., 85, 339, 384
 Lewis, E. B., 130
 lethal effects, 285
 linkage, 3, 149, 215, 229, 383
 livestock, 123

- loganberry, 101
 longevity, 79
Luzula, 331
 Lysenko, T. D., 252
- mahdiberry, 99
 Maheshwari, 321
 maize, 123
 cytogenetics of, 379
 major genes, 63
 male sterility, 99 *et seq.*
Maniote, 67
 mass selection, 10
 maternal inheritance, 270
 Mather, K., 1, 106, 125, 131, 384
 Mathieson, M. J., 384
 mating, discriminative, 138
 maximum likelihood, 223
 McAulay, A. L., 109
 McClintock, 163, 294
 Medawar, P. B., 129
 meiosis, 101, 340
 Mendelians, early letters, 383
 Mendelian segregation, 88
 mentor, 253
 Michurin, I. V., 252
 micro-organisms, genetics, 377
 migration, 67
 misdivision, 178
 Mittwoch, U., 384
 MN blood groups, 122
 Moffett, A. A., 369
 Mollison, P. L., 122
 monosomic, 178, 296, 299
 Montalenti, 357
 mosaic, 87
 mosaic mutant, 243
 moth, 380
 mouse, 215, 229, 243, 262, 378, 379, 380, 384
 eggs, polyploid, 378
 house, 378
 testis, P³² autoradiographs of, 383
 Mourant, A. E., 122
 Muller, 352
 mutation, 339
 lethal, 109
 mosaic, 87
 reverse, 246
 spontaneous, 343
- neurological actions, 379
 newts, hybrid, 380
 Nilsson-Ehle, 375
 nitrogen mustard, 380
 nucleid acid, 322
 nullisomics, 301
 Nutman, P. S., 263
- Oenothera*, 106, 339
 oocyte nuclei, amphibian, 378
 Owen, A. R. G., 357
Oxalis valdiviensis, 377
- Painter, T., 322
 pairing frequencies, 174
 inverted, 187
Panaxia, 74
 dominula, 380
Panicum, 370
 parthenogenesis, 102
