# Characterization of X-ray-generated floral mutants carrying deletions at the *S*-locus of distylous *Turnera subulata*

JDJ Labonne, F Tamari and JS Shore

*Heredity* (2010) **105**, 244; doi:10.1038/hdy.2010.83

**Correction to:** *Heredity* (2010) **105**, 235–243; doi:10.1038/hdy.2010.39; published online 14 April 2010

The authors have discovered an error that they would like to correct. Figure 3, Characterization of 12 *S*-locus mutants, shows two markers (*RP81E18* and *P9SP1*)

at distances of <0.5 and 0.5 cM, respectively. The actual distance for marker *RP81E18* is <0.05 cM, and that for marker *P9SP1* is 0.05 cM, as correctly indicated in the text.

The authors apologize for this error.
