Correction to: *Laboratory Investigation* (2015) **95**, 684–696; doi:10.1038/labinvest.2015.51 published online 13 April 2015

In the Materials and Methods section on page 2, left column, in the *Generation of iDC* paragraph, three of the

differentiation factors inadvertently have the wrong concentrations. The proper concentrations are: SHH—50 ng/ml; Jagged—100 ng/ml; TGF-B—10 ng/ml. These minor corrections do not affect the findings or conclusions of the manuscript.
