Corrigendum: Molecular mechanism for the regulation of yeast separase by securin

Shukun Luo & Liang Tong

Nature **542**, 255–259 (2017); doi:10.1038/nature21061

In Fig. 3c of this Letter, the bottom left helix should have been labelled ‘ α E’ rather than ‘ α A’. This helix is also mentioned in the main text, where “positioned near the N terminus of helix α A in CD” should have read “positioned near the N terminus of helix α E in CD”. The original Letter has been corrected online.
