

## CORRIGENDUM

## Exchange-enhanced reactivity in bond activation by metal-oxo enzymes and synthetic reagents

Sason Shaik, Hui Chen and Deepa Janardanan

*Nature Chemistry* 3, 19–27 (2011); published online 15 December 2010; corrected after print 18 April 2012.

In the version of this Article originally published, in Fig. 1d the energy levels  $^4P$  and  $^6P$  were interchanged, and should have appeared as shown below. Also, the start of the final sentence of the section ‘Interplay of exchange and orbital promotion energies’ should have read: “Finally,  $S = 5/2$  becomes virtually degenerate with the ground state...”. These errors have been corrected in the online versions of the Article.
