

## ERRATUM

---

## Post-transplant Kaposi sarcoma originates from the seeding of donor-derived progenitors

P. Barozzi, M. Luppi, F. Facchetti, C. Mecucci, M. Alù, R. Sarid, V. Rasini, L. Ravazzini, E. Rossi, S. Festa, B. Crescenzi, D.G. Wolf, T.F. Schulz & G. Torelli  
*Nat. Med.* 9, 554–561 (2003).

In the version of this article initially published online, the Methods section contained an error. The second sentence of “Morphologic and immunolocalization studies” should read, “...a monoclonal rat antibody against recombinant LANA-1...”  
We regret the error.

## CORRIGENDUM

---

## Reply to “Tissue plasminogen activator and NMDA receptor cleavage”

Denis Vivien, Monica Fernández-Monreal, Olivier Nicole & Alain Buisson  
*Nat. Med.* 9, 372–373 (2003).

The name of the second author should be listed as Monica Fernández-Monreal.
