
Corrigendum: ErbB2 receptor tyrosine kinase signaling mediates early demyelination induced by leprosy bacilli

N Tapinos, M Ohnishi & A Rambukkana

Nat. Med. **12**, 961–966 (2006); published online 30 July 2006; corrected after print 17 August 2006

In the version of this article initially published, the middle panel of **Figure 4d** incorrectly reported the percentage of demyelination in *M. leprae*-treated cultures. The percentage should be 67 ± 3.1 instead of 7 ± 3.1 . The error has been corrected in the HTML and PDF versions of the article.

RETRACTION: The autoimmune regulator (Aire) controls *i*NKT cell development and maturation

Qing-Sheng Mi, Zhong-Bin Deng, Sunil K Joshi, Zai-Zhao Wang, Li Zhou, Sarah Eckenrode, Ratanmani Joshi, Dalam Ly, Bing Yi, Terry L Delovitch & Jin-Xiong She

Nature Medicine **12**, 624–626 (2006)

We are retracting this report as it contains several errors, including duplications and manipulations of some flow cytometry plots in **Figure 1a** and in **Supplementary Figure 2** online, incorrect juxtaposition of data in **Figure 1g** (spleen) that in fact derive from different experiments, and inaccurate reporting of the absolute number of *i*NKT cells and s.d. values, even though the statistical significance remains unchanged. Although original data exist for each figure that largely support the conclusions drawn, we believe that the number of figures affected means that the appropriate response is to retract this paper.
