

CORRIGENDUM

Expanding the medicinal chemistry synthetic toolbox

Jonas Boström, Dean G. Brown, Robert J. Young and György M. Keserü

Nature Reviews Drug Discovery **17**, 709–727 (2018)

The percentages for the five most common reaction types presented in Figure 1a were incorrectly calculated, but the overall message was not affected; these reactions represent the majority (>60%) used to produce compounds in drug discovery programmes (*J. Med. Chem.* **59**, 4443–4458; 2015). Figure 1a and its description in the article text have been corrected in the online versions of the article. The authors apologize for the error.
