

NATURE REVIEW

REVIEWS AND COMMENT FROM THE NATURE PUBLISHING GROUP

▲ Rethinking the central causes of diabetes. Elmquist, J. K. & Marcus, J. N. *Nature Medicine* June (2003)

● **Proteins pure and applied.**
Nature 22 May (2003)
An overview of new products for protein purification, scaled-up production and analysis.

◀ **Mining the genome for combination therapies.**
Golub, T. R.
Nature Medicine May (2003)

● **The double puzzle of diabetes.**
Diamond, J.
Nature 5 June (2003)

● **Regulation of IL-4 gene expression in T cells and its therapeutic perspectives.**
Li-Weber, M. & Krammer, P. H.
Nature Reviews Immunology July (2003)

● **Rethinking clinical trials for cytostatic drugs.**
Millar, A. W. & Lynch, K. P.
Nature Reviews Cancer July (2003)

● **Cancer genetics and drug discovery in the zebrafish.**
Stern, H. M. & Zon, L. I.
Nature Reviews Cancer July (2003)

● **Turned off by RNA.**
Kleinjan, D. A. & van Heyningen, V.
Nature Genetics June (2003)
This News and Views article speculates on the role that antisense-mediated methylation and silencing might play in the manifestation of disease.

● **ALLHAT: a saga of missed opportunities.**

McInnes, G. T.
Journal of Human Hypertension June (2003)

● **Do fluorescent drugs show you more than you wanted to know?**

McGrath, J. C. & Daly, C. J.
British Journal of Pharmacology May (2003)

● **Deafening cycle.**

Baumgartner, B. & Harper, J. W.
Nature Cell Biology May (2003)

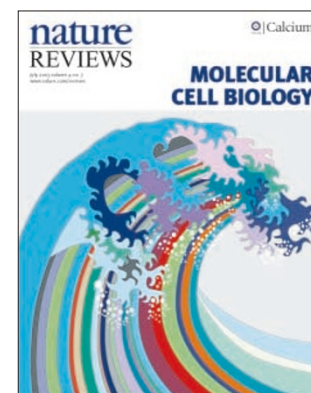

A discussion of new data implicating Cdk inhibitors and inappropriate hair cell proliferation in deafness.

▼ **Special focus: Calcium.**

Nature Reviews Molecular Cell Biology July (2003)

● **Phospholamban: a crucial regulator of cardiac contractility.**
MacLennan, D. H. & Kranias, E. G.

● **Calcium-signalling dynamics, homeostasis and remodelling.**
Berridge, M. J., Bootman, M. D. & Roderick, H. L.
