A case of severe, refractory diabetic gastroparesis managed by prolonged use of aprepitant

Kiang Chong and Ketan Dhatariya

Original article Chong, K. & Dhatariya, K. A case of severe, refractory diabetic gastroparesis managed by prolonged use of aprepitant. *Nat. Rev. Endocrinol.* 5, 285–288 (2009).

In the May issue of *Nature Reviews Endocrinology*, the dosage of erythromycin in the first sentence of the fourth paragraph of The Case section should have read “low-dose erythromycin (0.5 mg/kg every 8 h)” instead of “low-dose erythromycin (5 mg/kg every 8 h)”.
