T_H17 cells in tumour immunity and immunotherapy

Weiping Zou & Nicholas P. Restifo

Nature Reviews Immunology 10, 248–256 (2010)

In the original version of this article, in the section under the subheading “IL-17 and T_H17 cells” on page 252, the sentence that began “Furthermore, although IL-17 deficiency leads to *increased* numbers of IFN γ -producing NK cells in the tumour-draining lymph nodes” was incorrect. This sentence should instead begin “Furthermore, although IL-17 deficiency leads to *decreased* numbers of IFN γ -producing NK cells in the tumour-draining lymph nodes”. The authors apologize for this error.
