

CELL OF THE MONTH

The winning image of this month's *Nature Cell Biology* and *Nature Reviews Molecular Cell Biology* 'Cell of the Month' competition was submitted by Cécile Chalouni (Ludwig Cancer Research Institute, Yale University School of Medicine, USA (cecile.chalouni@yale.edu)). It shows the results of an immunohistochemical study of the human colon.

A frozen human colon tissue section was stained for actin (green) and the epithelial marker A33 (red). Nuclei were stained blue. The image was obtained using a Zeiss LSM 510 confocal microscope (x40 objective). Bar, 25 μm .

The winner would like to thank Derek Toomre and Ira Mellman (both at the Ludwig Cancer Research Institute, Yale University School of Medicine, USA) for support and advice.
