
CORRIGENDUM**Splitsville: structural and functional insights into the dynamic bacterial Z ring***Daniel P. Haeusser & William Margolin**Nature Reviews Microbiology* **14**, 305–319 (2016)

In the sixth paragraph of the section 'FtsA and the dynamics of proto-ring assembly', the sentence "Finally, an FtsZ mutant with decreased self-bundling *in vitro* (FtsZ-E93R) has reduced function in cell division^{50,51}," should have read "However, an FtsZ mutant with increased self-bundling *in vitro* (FtsZ-E93R) has reduced function in cell division^{50,51}." The authors apologize to the readers for any misunderstanding caused.
