Astrocyte barriers to neurotoxic inflammation

Michael V. Sofroniew

Nature Reviews Neuroscience **16**, 249–263 (2015)

In Figure 3 (left panel) of this article, the interleukins (ILs) being released from the astrocyte functional barrier into the perivascular space (PVS) and subarachnoid space (SAS) should have been listed as IL-1 β , IL-6, IL-7, IL-11, IL-15 etc. The article has been corrected online.
