

TRIPLE BRISTLE FOR A WINNING SMILE

With the introduction of the 'ugly duckling' Triple Headed Toothbrush, Trycare have launched a paradigm shift in electric toothbrush heads that makes the Philips Sonicare even more effective, in fact three times more effective.

Designed by a dentist, the 'ugly duckling' Triple Headed Toothbrush Head features individual labial, lingual and occlusal orientated brush heads which combine to provide the most thorough toothbrush experience your mouth has ever enjoyed, delivering three times more prophylaxis for a two-minute cycle.

Featuring patented angled brush heads that clean along the gingival margin and extra soft bristles that do not harm enamel or gingiva, the labial and lingual heads are positioned at a 45° angle so they automatically brush perfectly every time. The three sides of the brush naturally adapting to the teeth so that it works on teeth of all shapes, sizes and positions.

Incorporating a built-in bristle indicator to let patients know it's time to change, 'ugly

duckling' Triple Headed Toothbrushes are recommended for children eight-years-old and above. They are safe for use with implants and other restorations.

If you would like to evaluate a Triple Headed Toothbrush Head with your Philips Sonicare contact Trycare for a free sample.

For more information about 'ugly duckling' Triple Headed Toothbrushes contact your local Trycare representative, call 01274 885544 or visit www.trycare.co.uk/triple-bristle.

DISCOUNT EXTENDED TO DENTAL NURSES, HYGIENISTS, THERAPISTS AND TECHNICIANS

Dental Protection's 'CGDent Scheme', under which members of the College of General Dentistry receive a discount on their Dental Protection subscription fees, is now available to dental nurses, dental hygienists, dental therapists, orthodontic therapists, dental technicians and clinical dental technicians.

The arrangement has been available to dentists since the launch of a partnership between the organisations in 2020.

Membership of the College is open to all registered dental professionals, and in line with the College's vision to support the whole dental team, the partnership with Dental Protection has now been extended to College members in all registrant categories. Those holding a Postgraduate Certificate (or higher-level qualification) in a relevant subject are eligible for Full Membership and can qualify for a 5% reduction on their indemnity fee, and those admitted to Fellowship benefit from an 8% discount.

To take advantage of the reduced fees, College members should contact Dental Protection. Existing Dental Protection members should call 0800 561 9000 to get their relevant discount applied, and those who are not yet Dental Protection members should visit <https://www.dentalprotection.org/uk> to join. The discount will need to be requested each year at renewal to allow for verification of continued eligibility.

Dental Protection members who are not yet members of the College should visit <https://cgdent.uk/membership>.

PREVENT THE SPREAD OF NOROVIRUS THIS WINTER

Ensuring the surfaces in your dental practice are free from viruses, such as norovirus, is vital in helping to protect your patients.

Consider using the Steri-7 Xtra range of disinfectants from Initial Medical to enhance your infection control routines.

The range is available as a concentrated solution, a ready-to-use spray, and wipes that are appropriate for use in all dental settings. There is also the option to choose between unscented or citrus-scented solutions. The range is designed to work on a variety of surfaces, including healthcare equipment as the formula is non-corrosive. Plus, it has a rapid kill rate of up to 99.9999% in seconds.

The Steri-7 Xtra range of disinfectants also utilises unique

Reactive Barrier Technology. This means that they offer continued protection against pathogens for 72 hours after application unless the product is rinsed away. So, leave the product to dry for added biosecurity.

To find out more, contact Initial Medical or visit the website here: <https://www.initial.co.uk/infection-control/surface-hygiene/>.

To find out more, get in touch at 0870 850 4045 or visit the website today www.initial.co.uk/medical.
