FREE COURSE LAUNCHED ON HOW TO PUT PREVENTION INTO YOUR PRACTICE

'Prevention in practice: putting children first' is a new online course available free to all dental professionals and students. With childhood caries remaining the leading cause of hospital admissions, it will be of particular interest to those keen to help address this pressing healthcare matter.

The course, hosted by The Dental Channel Ltd, focuses on the use of brief interventions to implement the recommendations of *Delivering better oral*

health: an evidence-based toolkit for prevention. It provides the background, including descriptions of successful prevention initiatives and how these have benefitted dental practices and their teams.

A special product pack is available free on request from TePe Oral Hygiene Products Ltd. Verifiable CPD is awarded, which is updated as additional content is completed. The course is kept current with updates including webinars and a professional networking group.

Implementing prevention is very much a team activity and it is hoped this initiative will appeal to all dental professionals and teams who treat children. Those who would like to share their experiences are warmly encouraged to do so in the networking group.

A webinar introducing the course was due to be held on the evening of 24 January.

GO GREEN FOR GYPSUM

Without the appropriate measures in place, gypsum waste from your practice can be seriously dangerous to the world around you. Trust Initial Medical and choose the Eco Gypsum Waste Containers, for effective waste management.

The containers provide for the careful storage of gypsum waste in your practice, allowing for safe disposal in accordance with Environmental Permitting Regulations 2016. Plus, the containers are manufactured from 100% recycled polymers, to further reduce your impact on the environment.

This green solution doesn't end here. Initial Medical will help you to meet legal regulations by handling the segregation of your waste, before it is disposed of at a specialist landfill site.

Initial Medical pride themselves on exceptional service whenever you need it. A personal Initial Medical consultant will be on-hand to manage your service agreement and answer any queries your practice has around waste disposal.

To learn more about implementing safe waste measures like the Eco Gypsum Waste Containers in your practice, contact the team today.

To find out more, get in touch at 0808 304 7411 or visit www.initial.co.uk/medical.

POWERFUL PROTECTION, DERIVED FROM NATURE

Perio plus+ mouthwashes are so effective, they are only recommended for short-term, guided use.

With Perio plus+ mouthwashes, chlorhexidine (CHX), well-known for reducing bacterial plaque, combines with CITROX, a mix of organic plant compounds derived from bitter oranges.

Choose which mouthwash to use with your patients, according to their oral health situations: Regenerate (for intensive care post-surgery); Balance (for people at increased risk of dental disease) and Forte

(following invasive dental procedures). Perio plus+ products can also be recommended before the delivery of certain treatments, for an extra line of defence against infection.

The alcohol-free solutions also contain PVP-VA, which forms a protective film over the teeth, gums and mucous membranes.

For powerful, optimised protection, recommend Perio plus+.

For more information, call 01480 862084, email info@curaprox.co.uk or visit www.perioplus.com/uk.
