The future of zygomatic workflows

The first-ever consensus on the treatment protocol for zygomatic implants has been published by the Network of ZAGA Centres.

'A modified Delphi consensus for rehabilitations anchored to zygomatic implants' set out to investigate the treatment approaches of 43 members of the global ZAGA Centres Network.

The result provided insight into the latest workflows, as the experts reached consensus on different aspects of zygomatic implant treatment including indications, pre-operative 3D planning, surgical protocols, implant design and follow up. This ZAGA collaboration established the first consensus protocol for safe and effective treatment of the atrophic maxilla with ZAGA Zygomatic dental implants.

Professor Cemal Ucer took part in the study, as an experienced and reliable figure in dental implantology. Engaging in both clinical and educational settings, Prof Ucer leads the Centre for Oral-Maxillofacial and Dental Implant Reconstruction, an acclaimed ZAGA Centre based in Manchester. His work utilises the latest techniques, and ensures referred patients receive high-quality care.

To learn more about how the latest zygomatic workflow developments affect your patients, or to discover training opportunities in Zygomatic implant surgery contact Prof Ucer and his team today at ucer@icedental.institute or Mel Hay at mel@mdic.co, call 01612 371842 or visit www.ucer-clinic.dental.

The ultimate solution for loupe hygiene

In today's world, cleanliness is paramount, especially for medical professionals and dentists relying on crystal-clear loupes for precision.

The alcohol-free antibacterial formula by Centrostyle ensures loupe frames and lenses remain impeccably clean and sanitised. Available in various sizes to accommodate every need – compact 35 ml and 60 ml for on-the-go professionals, and a generous 150 ml for optical maintenance.

Spray Clean caters to all types of lenses, even those with special coatings. For optimal results, pair it with our Macroclean kingsize microfibre cloth. Elevate your loupe hygiene with Centrostyle's Spray Clean and ensure your vision remains crystal clear.

Exceptional decontamination requires excellent equipment

Eschmann provides a comprehensive portfolio of equipment, consumables and services to help you maintain exceptional decontamination processes.

These include the range of Little Sister autoclaves, offering 'B' and 'N' type cycles with varying capacities and sizes to suit different practice needs. Added features such as real-time recording and automatic data logging ensure efficient and highly accurate cycle monitoring and documentation.

Another solution in the portfolio is the Miele under bench washer disinfectant, which offers heavy duty cleaning, disinfection and drying in under an hour to support best practice cleaning of instruments.

The combination of touch controls, auto-close doors and a built-in water softener streamlines workflows and prolongs product life.

All Eschmann equipment can also be supported by the all-encompassing Care & Cover programme, which provides invaluable maintenance and servicing by factory-trained, UK-based engineers. This consists of unlimited breakdown cover, Annual Validation and Pressure Vessel Certification, unlimited Eschmann parts and labour as well as Enhanced CPD user training as standard, for complete peace of mind.

Discover these and many more leading solutions and elevate your infection control processes with Eschmann today!

For more information on the highly effective and affordable range of infection control products from Eschmann, visit www.eschmann.co.uk or call 01903 875787.
