Eye (2023) 37:3053; <https://doi.org/10.1038/s41433-023-02663-0>

Correction to: *Eye* <https://doi.org/10.1038/s41433-023-02609-6>, published online 17 June 2023

In the original article, the name Terence R. Tarrant was incorrectly given as 'Terance R. Tarrant'. Additionally, the following footnote was added: "Whilst writing this article I received the news that Terence Tarrant sadly passed away aged 93 after a short illness. For 46 years Tarrant examined and documented patient's eyes and the paintings he produced significantly contributed to British Ophthalmology. When studying his artwork one can easily identify if it's a 'Tarrant'. His signature and paintings are as recognisable as any long-established artist that features in any

national gallery. It has been the honour of this author to share his story, covering the life and career of the last retinal artist."

The article "Painting unknown worlds", written by Jonathan Brett, was originally published online on the publisher's internet portal on 17 June 2023 with Open Access under a Creative Commons Attribution (CC BY) license 4.0. With the authors' decision to cancel Open Access the copyright of the article changed on 4 July 2023 to © The Author(s), under exclusive licence to The Royal College of Ophthalmologists 2023 with all rights reserved. The original article has been corrected.
