Publisher Correction: Inference of RNA decay rate from transcriptional profiling highlights the regulatory programs of Alzheimer's disease

Rached Alkallas^{1,2}, Lisa Fish^{3,4,5}, Hani Goodarzi^{3,4,5} & Hamed S. Najafabadi^{1,2} 

Correction to: *Nature Communications*; <https://doi.org/10.1038/s41467-017-00867-z>; published online: 13 Oct 2017.

The original version of this Article contained an error in Figure 3, where panel d was inadvertently replaced with a duplicate of panel c during typesetting. Also, the legend of Figure 5f incorrectly read '310 AD patients (blue dots, $r = -0.4$) and 157 non-demented individuals (green dots, $r = -0.1$)', and should have read '310 AD patients (blue dots, $r = -0.1$) and 157 non-demented individuals (green dots, $r = -0.4$)'. Both of these errors have now been corrected in both the PDF and HTML versions of the Article.
