In the version of the article initially published, due to mistakes during figure preparation, Figs. 1f, 5g and 6d contained incorrect or duplicate panels. In the U2OS/MTX300 row of Fig. 1f, the HE image for Vector was the wrong image. In the top row of Fig. 5g, the image for sgSmgGDS #2 (E254K/E256K) was a duplicate of SmgGDS (sg2) in the same row. In the top row of Fig. 6d, the HE image for Rab22a-NeoF1(Δ 1-10) was a duplicate of the Vector image in the same row. These errors do not affect the conclusion of the study. The original and revised images are available in the Supplementary Information accompanying this amendment. The figures have been corrected in the HTML and PDF versions of the article.

The authors noticed that an incorrect image was used in Fig. 6c to represent the H&E panel of the Exo^{Soft} condition, due to a mistake made during figure assembly. They have updated the figure and apologize for the error. The original and corrected Fig. 6c are shown below as Fig. 1. The error is in presentation only and does not affect the conclusions of the study.
