In the version of the article initially published, the denotation of the first and second ring intensities (“I” values) were swapped twice in the caption to Fig. 2, and again in the caption to Fig. 4. Also in the Fig. 2 legend, two occasions of “SP and SP*” have been corrected to “SP* and SP”. The x and y axes in Fig. 2a, d, g, j and Fig. 3g, and the colours of the y axes in Fig. 2f and l, were switched and have now been corrected. The text now reading “this manifests in the AAB regions appearing to have lower peak intensity in the average aged second ring of Bragg disk intensities ($I_{2110} + I_{1210} + I_{1120}$)...” has been corrected from “average first ring of Bragg disk intensities ($I_{0110} + I_{1010} + I_{1100}$)...”. The Supplementary Information was an earlier, incorrect version and has now been replaced. These corrections have been made to the HTML and PDF versions of the article.
