Correction to: *Nature Microbiology* <https://doi.org/10.1038/s41564-020-0669-1>, published 24 February 2020.

In the version of the Letter originally published, the 'RR' motifs were incorrectly positioned underneath 70S ribosomes in Fig. 1d; they should have been aligned to the beginning of *speFL* genes. This error has now been corrected, and the original and corrected panels are shown below.
