

## Author Correction: Nanophotonic optical gyroscope with reciprocal sensitivity enhancement

Parham P. Khial , Alexander D. White  and Ali Hajimiri 

Correction to: *Nature Photonics* <https://doi.org/10.1038/s41566-018-0266-5>, published online 8 October 2018.

In the version of this Letter originally published, in equation (1), ‘ $n$ ’ should not have been included, the equation should have read:

$$\Delta\varphi_{\text{Sagnac}} = \frac{8\pi}{\lambda c} m \mathbf{A} \cdot \boldsymbol{\Omega} \quad (1)$$

Accordingly, in the sentence following equation (1), the definition “ $n$  is the refractive index of the medium” should not have been included either; it has now been deleted. In addition, the authors should have declared the following competing interest: “P.P.K. and A.H. have filed a patent application (Integrated optical gyroscope with noise cancellation, US patent application US 15/993,525; 13 December 2018).” These corrections have been made in the online versions.
