

## Author Correction: Functional 5' UTR mRNA structures in eukaryotic translation regulation and how to find them

Kathrin Leppek, Rhiju Das and Maria Barna

*Nature Reviews Molecular Cell Biology* (2018) <https://doi.org/10.1038/nrm.2017.103>

Published online 22 November 2017

The legend of Figure 1 has been modified to remove misleading referencing to evolution. The title of the legend has been modified from 'Evolutionary expansion of eukaryotic 5' UTR lengths' to 'Interspecies variation in 5' UTR lengths'; the first sentence of the legend has been modified from 'The length of 5' untranslated regions (UTRs) has increased in eukaryotes during evolution...' to 'The length of 5' untranslated regions (UTRs) varies in eukaryotes...'. The changes have been made in the HTML and PDF versions of the manuscript.

## Author Correction: Sphingolipids and their metabolism in physiology and disease

Yusuf A. Hannun and Lina M. Obeid

*Nature Reviews Molecular Cell Biology* 19, 175–191, (2018) <https://doi.org/10.1038/nrm.2017.107> Published online 22 November 2017

In the original FIG. 2, sphingolipids on the endosomal and lysosomal membranes are facing the outside of these organelles. The correct orientation of these species should be towards the lumen, as shown in the corrected figure. The changes have been made in the HTML and PDF versions of the manuscript.
