Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-019-41109-0>, published online 18 March 2019

This Article contains an error in Table 4. The *p*-values recorded for the 'Daily average temperature column' are incorrectly placed under the 'Daily maximum temperature' column. The correct Table 4 appears below as Table 1.

	Daily average temperature (n = 195,222,132 person-days; 15,771 deaths)				Daily maximum temperature (n = 503,398,992 person-days; 40,280 deaths)			
	Coefficient <sup>a</sup>	95% CI		<i>p</i> -value	Coefficient	95% CI		<i>p</i> -value
		Lower	Upper			Lower	Upper	
Intercept	-9.9519	-11.5942	-8.3096	<0.0001	-8.9466	-9.4384	-8.4548	<0.0001
Temperature	0.0341	-0.0851	0.1533	0.575	-0.0141	-0.0464	0.0181	0.395
Temperature squared <sup>b</sup>	-0.0004	-0.0026	0.0018	0.750	0.0002	-0.0003	0.0007	0.359
Statin <sup>c</sup>	-9.9122	-14.6399	-5.1845	<0.0001	-2.0752	-3.3320	-0.8184	0.001
Temperature × Statin	0.6791	0.3337	1.0245	0.0001	0.1102	0.0277	0.1927	0.009
Temperature squared × Statin	-0.0117	-0.0180	-0.0054	0.0003	-0.0017	-0.0030	-0.0004	0.016
Relative humidity <sup>d</sup>	-0.0016	-0.0026	-0.0006	0.002	-0.0042	-0.0049	-0.0035	<0.0001

**Table 1.** Sensitivity analysis: Statins' effect on the association between high temperature and all-cause mortality: results of logistic regression with daily relative humidity included. 95% CI: 95% confidence interval. Daily average temperature: 24–43 °C (75–110 °F). Daily maximum temperature: 24–49 °C (75–120 °F). *p*-value:  $\alpha = 0.05$ , two-tailed test. <sup>a</sup>Coefficient: coefficients in the logistic regression analysis. <sup>b</sup>Temperature squared: 2nd degree polynomial term of temperature. <sup>c</sup>Statin: current statin exposure status (1 = current statin user; 0 = former statin user). <sup>d</sup>Relative humidity: daily relative humidity.
