

GLOVES WITH SKIN-SOOTHING COLLAGEN

Medicom Healthcare B.V. has announced the European launch of their new Medicom SafeTouch Collagen Nitrile glove. These gloves, in an attractive magenta colour, stay comfortable even during the most challenging procedures due to the addition of a skin-soothing collagen compound.

Collagen gives skin its strength and flexibility and helps to maintain and promote the appearance of smoothness. Injected and coated with the lotion-like compound for maximum benefit to hands, Medicom Safetouch Collagen Nitrile gloves will help promote smoother, softer skin

and combat certain signs of ageing. The gloves are made from soft, flexible, form fitting nitrile, which offers maximum comfort, plus protection against latex allergies.

SafeTouch Collagen is one of the latest in a line of innovative products from Medicom, the company behind other well-known brands such as Safe+Mask face masks, Safe-Seal Duet sterilisation pouches and Safe Gauze non-woven sponges.

For more information on this product or other Medicom infection control products, visit www.medicom-eu.com.

WIN AN IPOD TOUCH

To celebrate the success of the free Brush DJ app, a brand new iPod Touch and £100 of iTunes vouchers are up for grabs. To enter the prize draw, visit www.BrushDJ.com and vote for your favourite song to brush your teeth to. The draw will stay open until the end of November.

The Brush DJ app provides evidence-based information on how to prevent dental disease directly to users. To encourage brushing for an effective length of time the app plays two minutes of music taken at random from the user's smartphone or iPod Touch.

The app links to the NHS Smokefree, Healthy Eating and sensible alcohol limits websites. Users can set reminders to brush twice a day, change their toothbrush and make a dental appointment.

NOZZLES INCLUDED IN THE PRICE

Bien-Air supply a range of maintenance products to help you maintain your handpieces and have recently reduced the prices to make them even more affordable.

Lubrimed medical grease cartridges are supplied in a box of six refills, enough for approximately 330 applications, recommended for Bien-Air high speed turbines (£18 + VAT).

Lubrifluid is a lubricant supplied in a 500 ml can complete with nozzles, developed for contra-angled, straight handpieces, air motors and turbines (£25 + VAT per can; £5 for 100 ml).

Spraynet is a disinfectant cleaning spray supplied in a 500 ml can complete with nozzles (£5 for 100 ml).

Aquacare is a cleaner specifically designed to dissolve physiological fluids such as saline. This is recommended for implantology handpieces (£20 + VAT for 500 ml; £4 for 100 ml).

When working out your costings don't overlook the fact that all Bien-Air maintenance product cans are 500 ml and that the nozzles are included in the price!

For further information or to place your order call Bien-Air on 01293 550 200.

VIVIDLY VIEW ROOT MORPHOLOGY IN LONDON

North London dentists and their patients can now benefit from clearer diagnosis and treatment planning of endodontic problems using the latest 3D radiography at a specialist clinic in Cockfosters. On 12 September, ENDOCLINIC celebrated becoming the first practice in the UK to install a new generation of Morita cone beam tomography scanners.

The ENDOCLINIC launch underlines the growing recognition of the value of CBCT technology in endodontic practice. The Morita Veraviewepocs 3D F40 has been developed to provide safe and accurate

X-ray images particularly for endodontic practice. The system offers up to three times the image detail of other 3D X-ray systems. For complex endodontic procedures, it shows the smallest detail in outstanding quality in just a few seconds. It gives an exact view down into the individual root structures, with all the information needed for treatment planning.

Cone beam CT provides a clear representation of specific root morphology, even of complicated root structures and of teeth with multiple roots. It also enables the dentist to form a precise judgement about adjacent structures which may be affected.

The facility is also available to other dental colleagues for imaging, and a radiologist's report will be provided.

www.morita-uk.com

On behalf of Morita, Robert Pounds hands over the new Veraviewepocs 3D F40 to Vida Adib and Maria Lessani of ENDOCLINIC.
