INSTRUMENTS TO MAKE ORTHODONTICS A CINCH

Hu-Friedy has launched a Slim Collection: six new orthodontic instruments which are considerably thinner and lighter than conventional tools. They enable orthodontists to work more efficiently and accurately than before as they improve intraoral adaptation, flexibility and view.

The Slim Collection includes pliers, tweezers and cutters. It includes the Slim Flush Cut & Hold Distal End Cutter with a 50% smaller head than before; the Slim Micro Cutter which has narrow tips; the Slim Hammerhead NiTi Pliers which reduces NiTi wire adaptation to

a single work step; the Distal Cinch Band Hand Instrument with slender working ends for improved access and view; the Slim Band Removing Pliers with a thin end that enables access to the work area without injuring the patient's gums; the Ultra Slim Weingart Pliers, Slim Direct Bond Bracket Tweezers and the Slim Buccal Tube Bonder Tweezers.

Hu-Friedy's orthodontic instruments are built to withstand the strains of steam sterilisation and are guaranteed for seven to ten years. All cutters can be sharpened once free of charge within the first 12 months after purchase.

THE NEXT GENERATION OF FLOWABLE RESTORATIVES

Dental materials technology leader GC Europe has launched two superior flowable materials, G-aenial Universal Flo and G-aenial Flo, to give patients the best aesthetic, functional and durable restorations.

Both flowable materials benefit from a composition that features a unique filler technology. Unlike other flowable composites the GC materials have a higher filler load and a homogeneous dispersion of fillers. The resulting improved strength

and wear resistance are two key features of these flowable materials, opening up the potential for a broader use than standard flowables.

G-aenial Universal Flo is radiopaque and features a high viscosity, making it ideal for placement in Class I-V restorations. Essentially, it looks like a flowable but behaves like a restorative. Its indications are for direct restorations, minimum intervention cavities and fissure sealing. With a physical

ORAL CARE PRODUCTS FOR SPIRITED SMILES

DenTek oral care products clean between the teeth and promote good oral hygiene for a fabulous smile and good overall physical health.

DenTek's Beyond Brushing product offering includes floss picks, interdental brush cleaners, dental picks and scalers and tongue cleaners to ensure effective interdental and breath remedies.

DenTek believes in oral health care delivered with a spirit of innovation to keep smiles healthy and happy. www.dentek.com

performance of a regular composite, this material is highly thixotropic and stays neatly in place holding its shape for ease of use. You will find it to be virtually self-polishing with superb invisible aesthetics.

These restoratives are dispensed through an ergonomically designed syringe that enables smooth delivery of the material, with a tapered tip that means no paste can stick to it. The syringe size provides a comfortable hold and the arched shape of the flange fits the hand ergonomically. The design also prevents material waste because minimal residual paste remains in the syringe after use.
