Normal and prudent research should be exercised before purchase or use of any product mentioned.

Staying protected in harsh environments

Winter brings with it some harsh conditions in the wilderness, but it's the dental practice that is the toughest environment of them all. The constant threat of dangerous pathogens and need for a continuous high level of infection control is far more unrelenting than the prospect of a bad winter.

That's why you need equipment you can trust to perform, such as the Little Sister range from Eschmann that is designed to work in the most demanding of environments.

Little Sister autoclaves and washer disinfectors are the epitome of reliability in times of need, and you can rest assured that you'll be able to deal with whatever is thrown at you thanks to Eschmann's Care&Cover Protection. Unrivalled and affordable, Care&Cover is available from as little as £8.50 per week.

Winter may be coming, but underperformance and unwanted downtime won't if you choose Eschmann.

For more information on the highly effective and affordable range of decontamination equipment and products from EschmannDirect, visit www.eschmann.co.uk or call 01903 753322.

Bone-level implants

Exclusive UK supplier of TBR implant systems, Dental Express is excited to offer dental professionals the latest bone-level implants from TBR.

For the last 30 years, TBR has been creating advanced implant systems; based in France, the expert team has focused on providing innovative and effective solutions, using the highest quality materials and most cutting-edge research. TBR implants and prosthetics systems provide a multitude of features to help optimise and simplify your daily practice, including:

- Bevelled collar – reduced compression of the crestal bone
- Machined titanium collar – reduced bacterial colonisation and proliferation
- Cylindrical implant body – improved bone-to-implant contact
- Conical, deep-threaded apex – excellent primary stability
- Simple drilling sequence – smooth workflow

- Platform switching –
 - Gingival ring-shaped sleeve around the implant
 - Absolute imperviousness to bacterial attacks
 - Reduction of micro-movements and inflammatory infiltration
 - Long-lasting aesthetics, bone stability and soft tissue preservation
- Angulation kit – easier selection of the appropriate angulation
- Shoulder height selector – measure the available gingiva
- Torque wrench – dual function with ratchet or torque wrench positions
- Universal colour code – identify the right components easily and quickly with the colour-coded system.

Find out more today about the unique TBR bone-level implants from Dental Express.

The crowning glory of modern restorations

Eliminate the need for traditional dental impressions with MyCrown – the fully integrated system that has been innovatively engineered to build sophisticated restorations chairside.

MyCrown offers an acquisition unit with both 2D and 3D capabilities, advanced software, and a milling unit that allows you to fabricate common restorations such as crowns, inlays and veneers quickly and easily. With its intuitive intraoral scanner, MyCrown can design and produce restorations with precision to ensure a supreme fit for every patient.

The state-of-the-art MyCrown software allows you to export detailed designs and share them among multiple clinics, or save them for your own personal reference. With MyCrown, you are not limited by specific manufacturers or materials so you can select restoration blocks according to your preference.

The efficiency of MyCrown means that restorations can be processed and completed in a single appointment, saving time for both you and your patient.

Bestow beautiful crowns on your patients today with MyCrown.
