

The power of regeneration

COLTENE has built its esteemed reputation on always striving for ground-breaking innovation and presenting the most up-to-date products for the finest possible endodontic results.

ROEKO GuttaFlow bioseal brings the power of regeneration and long-term restoration to root canal treatment. This remarkable, bioactive obturation material contains supportive properties and natural repair components including calcium and silicates.

It has a curing time of only 12-16 minutes and forms a hydroxylapatite crystal surface to enhance adhesion and set biochemical processes in motion to stimulate the regeneration of bone and dentine tissue.

Addressing the complexities of the root canal system,

GuttaFlow bioseal is a fully adaptable material with a combination of free-flowing gutta-percha and a sealer available in a practical, easy to use 5 ml Automix syringe. ROEKO GuttaFlow bioseal is an intelligent obturation material with the power to both seal and to heal.

To create reliable, long-lasting outcomes for your patients, order ROEKO GuttaFlow bioseal from COLTENE now.

A new immediate-loading concept

Dentsply Sirona has launched the latest essential solution for immediate implant-supported restorations with SmartFix EV, a new string in the bow of the versatile Astra Tech Implant System.

- A stable solution for cases with anatomically-compromised bone volume, offering angled or longer implants to increase bone-to-implant contact and reduce the need for bone augmentation
- A simplified restorative concept to reduce chairtime and create a uniform interface able to support both fixed and removable prosthesis solutions
- Reduced treatment time and costs for patients
- Patients leave with implant-retained teeth on the day of surgery
- Benefitting from integration with the versatile Osseospeed EV implant range
- A versatile and prosthetically-driven protocol for superior aesthetic results
- A team-centric approach which delivers high-quality, predictable results.

The tilting of implants has been used in clinical practice for over a decade with good results. Take advantage of the latest and most advanced iteration of this effective approach, and add SmartFix EV to your portfolio of implant-borne restorations today.

To find out more about the extensive range of restorative solutions, materials and equipment, visit dentsplysirona.com or call 01932 853 422.

You can also access a range of education resources, video tutorials, courses and CPD webinars at dentsplysirona.com/ukeducation.

Leave your forceps in the drawer

Let's admit it: occlusion can be a difficult and awkward procedure. Even the most nimble-fingered dentists fumble with the tricky combination of film and forceps as their patients are left with no choice but to deal with the discomfort.

Or, rather, that was the way things were: the advent of Bite-Chek dental film has made a world of difference in measuring a patient's bite. Its easy-grip handle means you can leave your forceps in their drawer, and its simple but ingenious design means the film will not curl but remain straight. Patients will also not run the risk of the pain of accidentally biting the metal forceps.

The Bite-Chek's outstanding accuracy for occlusal measurements is its other selling point. The thinness of its film means it offers

much greater accuracy than traditional methods, in which imprecise figures can cause major problems.

Available exclusively in the UK from Dental Express (a trading division of Surgery Express Llp), the Bite-Chek is the game changer in occlusal readings.

For more information, visit www.dental-express.co.uk, call 0800 707 6212, or email web@dental-express.co.uk.

Making a tangible difference to your practice

Trycare was conceived to merge old fashioned 'full service dealer' values with the latest technology. Sincerity and integrity are important to Trycare and the company want its contact with customers to give value added. In the modern terminology, Trycare wants to make a difference.

Trycare makes its visits informative and interesting whilst ensuring that regular general supplies are dealt with outstanding efficiency and at competitive prices.

Trycare is the UK's most dominant

surgical supplier but also has Tokuyama composites that for the ninth year in succession were chosen by *The Dental Advisor* magazine as the best Universal Composite in the USA. Just one of the many innovative products Trycare has that make a tangible difference to your practice.

Trycare is achieving record sales both of general consumables and innovative specialties.

To find out more and meet with one of the Trycare team call 01274 885544 or visit www.trycare.co.uk.
