H. K. LEWIS & Co. Ltd., LONDON

ISSN 0007–0920.
**NOTICE TO CONTRIBUTORS**

The British Journal of Cancer will accept papers which contain new information, constitute a distinct contribution to knowledge, and are relevant to the clinical, epidemiological, pathological or molecular aspects of oncology. The Journal will also publish Short Communications (of up to 1500 words) and invited Book Reviews. Letters on scientific matter arising from material published in the Journal will also be considered by the Editors. The language of the Journal is English. Accepted papers become the copyright of the Journal.

**Manuscripts** should be sent to the Editorial Office* in duplicate. They should be typewritten on one side of the paper only, with a wide margin, double spaced and bearing the name of each author and the institute where the work was carried out. Where authors are from more than one institute, indicate clearly which author is at which institute. The name and full postal address of the author who will be responsible for reading proofs should be given on the first page. Complete papers should carry an informative Summary and may have section headings. Short Communications will have neither. The Editorial Board reserves the right to make literary corrections.

**Titles.** These are the most read part of papers. Authors should compose them with great care. They should combine brevity with clarity; the shorter the better, not exceeding 100 letters. Authors should submit their own *running title*, which must not exceed 50 letters.

**Illustrations** should be referred to in the text as "Figs." and be given Arabic numbers. They should be marked on the back with the name(s) of the author(s) and the title of the paper. Where there is any possible doubt as to the orientation of an illustration, the top should be indicated by an arrow. Photographs and photomicrographs should be high quality, unmounted glossy prints and should not be retouched. Magnification is best indicated by a line representing a defined length, included within the photograph. Colour illustrations will be accepted when found necessary by the Editor, although the author will be expected to contribute to the cost. Diagrams should be on separate sheets; they must be drawn with **black Indian ink on white paper or feint-ruled graph paper** and should be about twice the size of the final reproduction. Lines should be of sufficient thickness to stand reduction. "Photocopies" are unacceptable. Each illustration should be clearly described by a legend; all legends should be grouped on a separate sheet of paper. Lettering on figures should be minimal and should not duplicate the legend.

There should be as few **tables** as possible; they should have a title and include only essential data; they should be typewritten on separate sheets and given Roman numbers.

**References.** Only papers closely related to the author's work should be quoted; exhaustive lists should be avoided. References in the text should be made by giving the author's surname, with the year of publication in brackets. When reference is made to a work by 3 authors, all names should be given when first cited and thereafter only the first name, adding *et al.* For 4 or more authors, the first name followed by *et al.* should be used on all occasions. If several papers by the same author and from the same year are cited, *a, b, c* etc. should be added after the year of publication. It is the author's responsibility to check the accuracy of all references before submitting a manuscript. References should be brought together at the end of the paper in alphabetical order. Titles of papers and all authors' names should be given in full. Names of journals should be abbreviated as in the *World List of Scientific Periodicals*, followed by the volume number and the page number, e.g.:

References to books and monographs should appear as following examples:

**Abbreviations** and units should follow the standards laid down in *Units, Symbols and Abbreviations* published by the Royal Society of Medicine, 1971.

**Reprints**† may be ordered on the form accompanying proofs.

* Editorial correspondence should be addressed to the Chairman of the Editorial Board, Professor L. G. Lajtha, Paterson Laboratories, Christie Hospital and Holt Radium Institute, Manchester M20 9BX.

† Business correspondence, including orders and remittances for subscriptions, single issues and reprints, should be sent to the publishers: H. K. Lewis & Co. Ltd, 130 Gower Street, London WC1E 6BS.

**Advertisement bookings** and enquiries to H. A. Collins Ltd, 37 Ruskin Road, Carshalton, Surrey SM5 3BQ.
Announcement

PILOT SCHEME FOR SUPPLY OF LABORATORY MICE

The Medical Research Council (UK) has set up a pilot scheme to increase and facilitate the supply of special inbred strains and mutant stocks not available commercially in Britain. For this purpose an Advisory Committee on Special Mouse Stocks has been set up under the Chairmanship of Dr Anne McLaren. The supply of SPF animals at an economic cost is envisaged, either as breeding nuclei or in larger numbers if appropriate advance warning is given. For planning purposes, the Committee would be glad to receive information on likely requirements in terms of strains and numbers. Information should be sent to Dr M. B. Kemp, Medical Research Council, 20 Park Crescent, London W1N 4AL.
