The British Journal of Cancer

EDITORIAL BOARD

L. G. Lajtha Chairman
M. Moore Executive Editor
A. J. Bateman Associate Editor

Volume 45, 1982

H. K. LEWIS & Co. Ltd., LONDON

ISSN 0007-0920
NOTICE TO CONTRIBUTORS

The British Journal of Cancer will accept papers which contain new information, constitute a distinct contribution to knowledge, and are relevant to the clinical, epidemiological, pathological or molecular aspects of oncology. The Journal will also publish Short Communications (of up to 1500 words) and invited Book Reviews. Letters on scientific matter arising from material published in the Journal will also be considered by the Editors. The language of the Journal is English. Accepted papers become the copyright of the Journal.

Manuscripts should be sent to the Editorial Office* in triplicate. They should be typewritten on one side of the paper only, with a wide margin, double spaced and bearing the name of each author and the institute where the work was carried out. Where authors are from more than one institute, indicate clearly which author is at which institute. The name and full postal address of the author who will be responsible for reading proofs should be given on the first page. Complete papers must be preceded by a Summary of not more than 200 words and may have section headings. Short Communications will have neither. The Summary should indicate the methods used, the important findings and the conclusions. It should be intelligible without reference to the main text. The Editorial Board reserves the right to make literary corrections.

Titles. These are the most read part of papers. Authors should compose them with great care. They should combine brevity with clarity; the shorter the better, not exceeding 100 letters. Authors should submit their own running title, which must not exceed 50 letters.

Illustrations should be referred to in the text as “Figs.” and be given Arabic numbers. They should be marked on the back with the name(s) of the author(s) and the title of the paper. Where there is any possible doubt as to the orientation of an illustration, the top should be indicated by an arrow. Photographs and photomicrographs should be high-quality unmounted glossy prints and should not be retouched. Magnification is best indicated by a line representing a defined length, included within the photograph. Colour illustrations will be accepted when found necessary by the Editor, although the author will be expected to contribute to the cost. Diagrams should be on separate sheets; they must be drawn with black Indian ink on white paper or faint-ruled graph paper and should be about twice the size of the final reproduction. Lines should be of sufficient thickness to stand reduction. “Photocopies” are unacceptable. Each illustration should be clearly described by a legend; all legends should be grouped on a separate sheet of paper. Lettering on figures should be minimal and should not duplicate the legend.

There should be as few tables as possible; they should have a title and include only essential data; they should be typewritten on separate sheets and given Roman numbers.

References. Only papers closely related to the author’s work should be quoted; exhaustive lists should be avoided. References in the text should be made by giving the author’s surname, with the year of publication in brackets. When the reference is to a specific part of a book, the page number should also be cited. When reference is made to a work by 3 or more authors, the first name followed by et al. should be used on all occasions. If several papers by the same first author and from the same year are cited, a, b, c etc. should be added after the year of publication. It is the author’s responsibility to check the accuracy of all references before submitting a manuscript. References should be brought together at the end of the paper in alphabetical order, where titles of papers and all authors’ names should be given in full (except if there are more than 6 authors, when the first 3 names should be followed by “and x others”, x being the actual number). Names of journals should be abbreviated as in the Index Medicus, but with full stops after abbreviations (and after authors’ initials), followed by the volume number and the page number, e.g.:

References to books and monographs should appear as in the following examples:

Abbreviations and units should follow the standards laid down in Units, Symbols and Abbreviations published by the Royal Society of Medicine, (third edition, 1977).

Reprints† may be ordered on the form accompanying proofs.

*Editorial correspondence should be addressed to the Executive Editor Dr Michael Moore, Paterson Laboratories, Christie Hospital and Holt Radium Institute, Manchester M20 9BX.
†Business correspondence including orders and remittances for subscriptions and single issues should be sent to the publishers: H. K. Lewis & Co. Ltd, 136 Gower Street, London WC1E 6BS.

Advertisements bookings and enquiries to H. A. Collins Ltd. 37 Ruskin Road, Carshalton, Surrey, SM5 3BQ.
Meeting Announcement

13th INTERNATIONAL CONGRESS OF CHEMOTHERAPY
28 August–2 September 1983
KONGRESSZENTRUM-HOFBURG, VIENNA, AUSTRIA

The programme will include antimicrobial and anticancer topics. Proceedings will be printed before the congress.

Further information from The President: Professor K. Karrer, Institute for Cancer Research, University of Vienna, Borschkegasse 8a, and the Secretariat of the XIIIth International Congress of Chemotherapy, c/o Wiener Medizinische Akademie, Alser Strasse 4, A-1090 Vienna, Austria.
FORTHCOMING PAPERS IN THE FEBRUARY ISSUE
OF THE BRITISH JOURNAL OF CANCER

BOYD, N. F., O'SULLIVAN, B., CAMPBELL, J. E., FISHELL, E., SIMOR, I., COOKE, G. AND GERMANSON, T.—Bias and the association of mammographic parenchymal patterns with breast cancer.

BOYD, N. F., O'SULLIVAN, B., CAMPBELL, J. E., FICHELL, E., SIMOR, I., COOKE, G. AND GERMANSON, T.—Mammographic signs as risk factors for breast cancer.

HARŁOŹIŃSKA, A., POTOMSKI, J., ŁAWINSKA, B., NOWOROLSKA, A. AND RICHTER, R.—High and low Fe IgG-receptor expression in human chronic granulocytic leukaemia cells.

ANTHONY, H. M.—Blood basophils in lung cancer.

MUELLER-KLIESER, W. F. AND SUTHERLAND, R. M.—Oxygen tensions in multicell spheroids of two cell lines.

SIERMANN, D. W.—Response of murine tumours to combinations of CCNU with Misonidazole and other radiation sensitizers.

KOVACS, C. J., BRAUNSWIEGER, P. G., SCHENKEN, L. L. AND BURHOLT, D. R.—Proliferative defects in renal and intestinal epithelium after Cis-Dichlorodiammine platinum (II).

Short Communications

BURDON, R. H., SILLAR, G. M. AND ALLEN, E.—Modulation of ascites tumour growth by nucleic acids and nucleosides.

GEORGE, K. C. AND SINGH, B. B.—Synergism of Chlorpromazine and hyperthermia in two mouse solid tumours.

Letters to the Editor

HOLMAN, C. D. J. AND ARMSTRONG, B. K.

CROMBIE, I. K.
