Notice to Contributors

*The British Journal of Cancer* will accept papers which contain new information, constitute a distinct contribution to knowledge, and are relevant to the clinical, epidemiological, pathological or molecular aspects of oncology. The Journal will also publish Short Communications (of ~1500 words) and invited Book Reviews. Letters on scientific matter arising from material published in the Journal will also be considered by the Editors. The language of the Journal is English. Accepted papers become the copyright of the Journal.

**Manuscripts** should be sent to the Editorial Office* in triplicate. Text pages should be numbered; the Title Page as 1, the Summary as 2 and the first page of the Introduction as 3, etc. They should be typewritten on one side of the paper only, with a wide margin, double spaced and bearing the name of each author and the institute where the work was carried out. Where authors are from more than one institute, indicate clearly which author is at which institute. The name, full postal address and telephone number of the author who will be responsible for reading proofs should be given on the first page. Complete papers must be preceded by a Summary of not more than 200 words and may have section headings. Short Communications will have neither. The Summary should indicate the methods used, the important findings and the conclusions. It should be intelligible without reference to the main text. The Editorial Board reserves the right to make literary corrections.

**Titles.** These are the most read part of papers. Authors should compose them with great care. They should combine brevity with clarity; the shorter the better, not exceeding 100 letters. Authors should submit their own running title, which must not exceed 50 letters. The top of each page should carry the running title and the name of the first author.

**Illustrations** should be referred to in the text as “Figures” and be given Arabic numbers. They should be marked on the back with the authors name(s) and the title of the paper. Where there is any possible doubt as to the orientation of an illustration, the top should be indicated by an arrow. Photographs and photomicrographs should be high-quality unmounted glossy prints and should not be retouched. Magnification is best indicated by a line representing a defined length, included within the photograph. Colour illustrations will be accepted when found necessary by the Editor, although the author will be expected to contribute to the cost. Diagrams should be on separate sheets; they must be drawn with black Indian ink on white paper or feint-ruled graph paper and should be about twice the size of the final reproduction. Lines should be of sufficient thickness to stand reduction. Photocopies are unacceptable. Each illustration should be clearly described by a legend; all legends should be grouped on a separate sheet of paper. Lettering on figures should be minimal and should not duplicate the legend.

There should be as few Tables as possible; they should have a title and include only essential data; they should be typewritten on separate sheets and given Roman numbers.

**References.** Only papers closely related to the author’s work should be quoted, and these should be to original papers only. Exhaustive lists should be avoided.† References in the text should be made by giving the author’s surname, with the year of publication in brackets. When the reference is to a specific part of a book, the page number should also be cited. When reference is made to a work by 3 or more authors, the first name followed by *et al.* should be used on all occasions. If several papers by the same first author and from the same year are cited, *a, b, c, etc.* should be added after the year of publication. It is the author’s responsibility to check the accuracy of all references before submitting a manuscript. References should be brought together at the end of the paper in alphabetical order, where titles of papers and all authors’ names should be given in full (except if there are more than 6 authors, when the first 3 names should be followed by “and *x* others”, *x* being the actual number). Names of journals should be abbreviated as in the *Index Medicus*, but with full stops after abbreviations (and after authors’ initials), followed by the volume, number and the page number, e.g.: McManus, M.J., Dombrske, S.E., Pienkowski, M.M. & 5 others (1978). Successful transplantation of human benign breast tumours into the athymic nude mouse and demonstration of enhanced DNA synthesis by human placental lactogen. *Cancer Res.*, 38, 2243.

References to books and monographs should appear as in the following examples:

**Abbreviations** and units should follow the standards laid down in *Units, Symbols and Abbreviations* published by the Royal Society of Medicine (third edition, 1977).

**Reprints** may be ordered on the form accompanying proofs.

*Editorial correspondence* should be addressed to the Editor, Dr Michael Moore, Paterson Laboratories, Christie Hospital and Holt Radium Institute, Manchester M20 9BX.

†Citation of Conference Proceedings or Meetings Abstracts should be avoided unless there is no other reference.
Papers to be published in 1983 include

Transplacental carcinogenesis with radioactive phosphorus – 
C.L. Berry et al

Chronic Arsenic Poisoning in the North of Mexico – 
Mariano Cebrian et al

Effect of Ethanol in fatal Carbon Monoxide Poisoning – 
L.A. King

Hair Regrowth after Cancer Therapy – S.L. George et al

Paracetamol overdose, protective effect of concomitantly ingested antimuscarinic drugs and codeine – F.O. Müller

Antithyroid effect of chlorpropamide – J. Feely
