PRODUCTION OF PLASMINOGEN ACTIVATORS BY HUMAN T-CELL LEUKAEMIA VIRUS-TRANSFORMED HUMAN T-CELL LINES. Hinuma, S., Honda, S., Tsukamoto, K., Sugamura, K. & Hinuma, Y.

THE FREE CYTOPLASMIC CALCIUM CONCENTRATION OF TUMOURIGENIC AND NON-TUMOURIGENIC HUMAN SOMATIC CELL HYBRIDS. Banyard, M.R.C. & Tellam, R.L.

OSTEOCLASTS AND THE RESORPTION OF BONE BY TRANSPLANTED MAMMARY CARCINOMA IN RATS. O'Grady, R.L. & Cameron, D.A.

ANALYSIS OF MAMMARY TUMOUR CELL METASTASIS AND RELEASE OF BOUND N-ACETYLNEURAMINIC ACID. Hoon, D.B.S., Ng, S.K. & Ramshaw, I.A.

MEASUREMENT OF BLOOD SUPPLY TO MURINE TUMOURS USING IN VIVO RED CELL LABELLING AND DYNAMIC SCINTIGRAPHY. Baker, G.M., Clarke, M.B. & Whimster, W.F.

THE UPTAKE OF ALPHA-FETOPROTEIN BY CI300 MOUSE NEUROBLASTOMA CELLS. Hajeri-Germond, M., Naval, J., Trojan, J. & Uriel, J.

A COMPARISON OF AN IMMUNOLOGICAL FAecal OCTULT BLOOD TEST FECATWIN SENSITIVE/FECA EIA WITH HAEMOCCULT IN POPULATION SCREENING FOR COLORECTAL CANCER. Armitage, N., Hardcastle, J.D., Amar, S.S., Balfour, T.W. & James, P.D.

ANTIBODY GUIDED LYMPHANGIOGRAPHY IN THE STAGING OF CERVICAL CANCER. Epenetos, A.A. for the Hammersmith Oncology Group & Imperial Cancer Research Fund

AN IMMUNOHISTOLOGICAL STUDY OF HLA ANTIGEN EXPRESSION BY GESTATIONAL CHORIOCARCINOMA. Sunderland, C.A., Sasagawa, M., Kanazawa, K., Stirrat, G.M. & Takeuchi, S.

EFFECTS OF RECOMBINANT LEUKOCYTE INTERFERON (rIFN-A) ON TUMOUR GROWTH AND IMMUNE RESPONSES IN PATIENTS WITH METASTATIC MELANOMA. Hersey, P., Hasic, E., MacDonald, M., Edwards, A., Spurling, A., Coates, A.S., Milton, G.W. & McCarthy, W.J.

CIGARETTE SMOKE EXTRACTS INHIBIT PROSTACYCLIN SYNTHESIS BY THE RAT URINARY BLADDERS. Jeremy, J.Y., Mikhailidis, D.P. & Dandoni, P.

CHEMOSENSITIVITY MEASUREMENTS OF HUMAN TUMOUR CELLS BY SOFT AGAR ASSAYS ARE INFLUENCED BY THE CULTURE CONDITIONS. Endresen, L., Tveit, K.M., Rugstad, H.E. & Pihl, A.

SELECTIVE TOXICITY OF 1-NAPHTHOL TO HUMAN COLORECTAL TUMOUR TISSUES. Wilson, G.D., d'Arcy Doherty, M. & Cohen, G.M.

LUNG TUMOUR CELL LINES SYNTHESIZING PEPTIDE HORMONES ESTABLISHED FROM TUMOURS OF FOUR HISTOLOGICAL TYPES. CHARACTERISATION OF THE CELL LINES AND ANALYSIS OF THEIR PEPTIDE HORMONE PRODUCTIONS. Luster, W., Gropp, C. & Kern, H.F.

MALIGNANT MELANOMA AND EXPOSURE TO FLUORESCENT AND OTHER LIGHTING SOURCES. Williamson, C. & Elwood, J.M.

CANCER INCIDENCE IN INDIAN CHRISTIANS. Jussawalla, D.J., Yeole, B.B. & Natekar, M.V.

ANALYSIS OF THE INFLUENCE OF TUMOUR CELL KINETICS AND HOST CELLS ON CLONING OF HUMAN MALIGNANT EFFUSIONS IN SEMI-SOLID AGAR. Hofmann, V., Berens, M.E., Fruh, U. & Berchtold, W.

SALMON AND HUMAN CALCITONIN LIKE MATERIAL IN LUNG CANCER. Gropp, C., Luster, W. & Havemann, K.

A COMPARISON OF RETINOL BINDING IN HUMAN HYPERPLASTIC AND MALIGNANT PROSTATE. Boyd, D., Copestake, P., Chisholm, G.D. & Habib, F.K.

OESTROGEN RECEPTORS IN PRIMARY BREAST CANCER. Williams, M.R., Nicholson, R.I., Elston, C.W., Griffiths, K. & Blamey, R.W.

REPLY. Alanko, A., Heinonen, E., Scheinin, T.M., Tolppanen, E.M. & Vihko, R.
Notice to Contributors

Manuscripts should be sent in triplicate (original plus two copies) to the Editor, Dr. Michael Moore. The criteria for acceptance of manuscripts to be published in the British Journal of Cancer are originality and high scientific quality. Manuscripts are accepted on the understanding that they report unpublished work that is not under consideration for publication elsewhere, that all named authors have agreed to its submission and that if accepted it will not be published in the same form, in any language, without the consent of the Publishers. Papers should be in English. Authors whose mother-tongue is not English are urgently requested to have their manuscripts checked for linguistic correctness before submission.

Manuscripts should be typewritten, double-spaced with a wide margin and on one side of the paper only. They should be accompanied by a title page numbered as 1, bearing title, authors full names, affiliation and addresses; and a summary of not more than 200 words. The author to whom correspondence, proofs and reprint requests are to be sent should be clearly indicated.

Full papers should be divided into sections:
1. Introduction
2. Materials and methods
3. Results
4. Discussion
5. Acknowledgements and References.

Short Communications (~1500 words) should not have the above section headings nor a summary. The Editor reserves the right to make literary corrections.

Titles. These are the most read part of papers. Authors should compose them with great care. They should combine brevity with clarity; the shorter the better, not exceeding 100 letters. Authors should submit their own running title, which must not exceed 50 letters. The top of each page should carry the running title and the name of the first author.

Illustrations should be referred to in the text as “Figures” and be given Arabic numbers. They should be marked on the back with the authors name(s) and the title of the paper. Where there is any possible doubt as to the orientation of an illustration, the top should be indicated by an arrow. Photographs and photomicrographs should be high-quality unmounted glossy prints and should not be retouched. Photomicrographs should be chosen so as to exclude technical artefacts. Clearly contrasted prints are essential for adequate reproduction. Magnification is best indicated by a line representing a defined length, included within the photograph. Colour illustrations will be accepted when found necessary by the Editor, although the author will be expected to contribute to the cost. Diagrams should be on separate sheets; they must be drawn with black Indian ink on white paper or faint-ruled graph paper and should be about twice the size of the final reproduction. Lines should be of sufficient thickness to stand reduction.

Photocopies are unacceptable. Each illustration should be clearly described by a legend; all legends should be grouped on a separate sheet of paper. Lettering on figures should be minimal and should not duplicate the legend.

There should be as few Tables as possible; they should have a title and include only essential data; they should be typewritten on separate sheets and given Roman numbers.

References. Only papers closely related to the author's work should be quoted, and these should be to original papers only. Exhaustive lists should be avoided. References in the text should be made by giving the author's surname, with the year of publication in brackets. When the reference is to a specific part of a book, the page number should also be cited. When reference is made to a work by 3 or more authors, the first name followed by et al. should be used on all occasions. If several papers by the same first author and from the same year are cited, a, b, c, etc. should be added after the year of publication. It is the author's responsibility to check the accuracy of all references before submitting a manuscript. References should be brought together at the end of the paper in alphabetical order, where titles of papers and all authors' names should be given in full (except if there are more than 6 authors, when the first 3 names should be followed by "and x others", x being the actual number). Names of journals should be abbreviated as in the Index Medicus, but with full stops after abbreviations (and after authors' initials), followed by the volume number and the page number, e.g.:

References to books and monographs should appear as in the following examples:

Abbreviations and units should follow the standards laid down in Units, Symbols and Abbreviations published by the Royal Society of Medicine (third edition, 1977).

Offprints may be ordered on the form accompanying proofs; 25 will be supplied free of charge.

*Editorial correspondence should be addressed to the Editor, Dr. Michael Moore, Paterson Laboratories, Christie Hospital and Holt Radium Institute, Manchester M20 9BX.

†Citation of Conference Proceeding or Meetings Abstracts should be avoided unless there is no other reference.
