nature publishing group 

**Nature Publishing Group (NPG) invites you to set up a free site license trial with any journal within our molecular and cell biology research portfolio**

A Nature Publishing Group site license allows you to provide your users with the convenience of desktop access, 24 hours a day, to groundbreaking original research and a broad network of related links. A NPG site license is flexible and can be tailored according to your institution's requirements.

Your trial will give your users access to the available archive along with the latest news and research published in NPG's journals. There is no commitment on your behalf and no payment is required.

Contact your sales representative for a FREE trial to any or all of this collection from NPG. Turn the page for more information about our molecular and cell biology portfolio.

## Nature

**Editor:** Dr Philip Campbell

51 issues per year

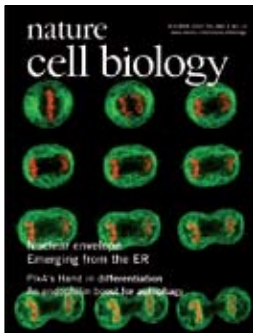

**Impact factor:** 26.681\*

*Nature* is essential reading for all those working in science or with an interest in science, across all scientific disciplines.

*Nature* is a weekly international journal, publishing the finest peer-reviewed research in all fields of science and technology on the basis of its originality, importance, interdisciplinary interest, timeliness, accessibility, elegance and surprising conclusions.

*Nature* also provides rapid, authoritative, insightful and arresting news and interpretation of topical and coming trends affecting science, scientists and the wider public.

[www.nature.com/nature](http://www.nature.com/nature)

ISSN: 1465-7392

## Nature Cell Biology

**Editor:** Bernd Pulverer

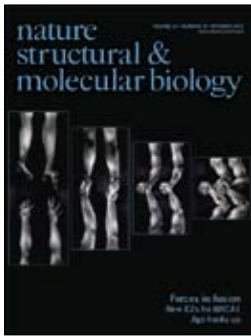

12 issues per year

**Impact factor:** 18.485\*

*Nature Cell Biology* appeals to the international biological and molecular science community, including researchers, PhD students and undergraduates.

*Nature Cell Biology* is a monthly peer-reviewed journal publishing original research of the highest quality with minimal delay. The journal covers all areas of cell biology and its research papers are characterized both by exceptional novelty and thoroughness. Complementing its cutting edge research content, *Nature Cell Biology* includes News & Views, expert analysis, editorials, commentary, reviews, perspectives and book reviews. The material never fails to inform and entertain; the aim is not merely to highlight major advances, but also places them in a broader context within the field of cell biology.

[www.nature.com/naturecellbiology](http://www.nature.com/naturecellbiology)

ISSN: 1545-9993

No.1 primary research journal  
in Biophysics

## Nature Structural & Molecular Biology

**Editor:** Boyana Konforti

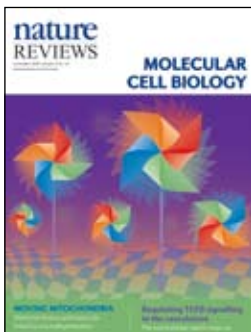

12 issues per year

**Impact factor:** 11.502\*

*Nature Structural & Molecular Biology* appeals to the international molecular, structural, biochemical and biophysical science community.

*Nature Structural & Molecular Biology* is an integrated forum for structural and molecular studies. The journal places a strong emphasis on functional and mechanistic understanding of how molecular components in a biological process work together. Specific areas include (but are not limited to) DNA replication, repair and recombination; chromatin structure and remodeling; transcription; translation; the folding, processing, transport and degradation of proteins and RNA; and signaling. Each issue also contains News & Views articles, Research Highlights and editorials that help place the primary research in a broader context.

[www.nature.com/nsmb](http://www.nature.com/nsmb)

ISSN: 1471-0072

No.1 monthly review journal  
in cell biology

## Nature Reviews Molecular Cell Biology

**Chief Editor:** Arianne Heinrichs

12 issues per year

**Impact factor:** 31.354\*

*Nature Reviews Molecular Cell Biology* is the leading monthly review journal in the field of molecular and cell biology. With its extraordinary breadth and depth of coverage, the journal provides a unique resource of information, opinion and commentary for a wide spectrum of readers, providing them with the essence of cutting-edge molecular and cell biology research.

All Reviews and Perspectives are carefully commissioned, written by leaders in the field, and subject to rigorous peer review – which results in timely and authoritative articles. In addition, articles are carefully edited and the diagrams redrawn by professional art editors, which makes for highly readable, visually attractive articles that are accessible to specialists and non-specialists alike. Non-specialist readers will also benefit from the glossary and highlighted references. Each issue also contains Research Highlights – short pieces that provide critical summaries of significant recent research papers.

[www.nature.com/reviews/molcellbio](http://www.nature.com/reviews/molcellbio)

ISSN: 0023-6837

Published on behalf of the  
United States and Canadian  
Academy of Pathology

## Laboratory Investigation

**Chief Editor:** James M. Crawford, MD, PhD

12 issues per year

**Impact factor:** 4.453\*

*Laboratory Investigation* offers prompt publication of high-quality original research in all biomedical disciplines relating to the understanding of human disease and the application of new methods to the diagnosis of disease. Emphasis is given to original research exploring the pathobiology of disease, including insights gained into the structural and molecular pathogenesis of disease, and the biological basis for morphologic manifestations of disease.

[www.laboratoryinvestigation.org](http://www.laboratoryinvestigation.org)

ISSN: 1350-9047

## Cell Death & Differentiation

**Editor:** Professor Gerry Melino

12 issues per year

**Impact factor:** 7.463\*

*Cell Death & Differentiation* is a journal devoted to the cell biology, molecular biology and biochemistry of cell death and disease, both in normal tissue regulation and in disease. To this end, *Cell Death & Differentiation* provides a unified forum for scientists as well as clinicians. It is committed to the rapid publication of high-quality original papers that relate to these subjects, together with topical, usually solicited, reviews, meeting reports, editorial correspondence and occasional commentaries on controversial and scientifically informative issues.

[www.nature.com/cdd](http://www.nature.com/cdd)

ISSN: 1001-0602

Published on behalf of  
Shanghai Institutes for  
Biological Sciences, Chinese  
Academy of Sciences

## Cell Research

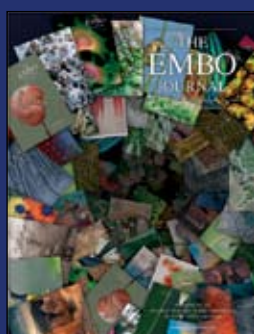

**Editor-in-Chief:** Professor Gang Pei

12 issues per year

**Impact factor:** 3.426\*

*Cell Research* is China's leading journal in the life sciences and publishes original research and reviews, commentaries and short communications in cell, molecular and developmental biology, and related fields such as apoptosis, immunology, neurobiology, signal transduction, cancer and stem cells. The journal has a broad international authorship and editorial board.

[www.nature.com/cr](http://www.nature.com/cr)

ISSN: 0261-4189

Published on behalf of the  
European Molecular Biology  
Organization

## The EMBO Journal

**Executive Editor:** Professor Pernille Rørth

24 issues per year

**Impact factor:** 10.086\*

*The EMBO Journal* provides for rapid publication of full-length papers describing original research of general rather than specialist interest in molecular biology and related areas. The journal encourages and publishes articles that report novel findings of wide biological significance in the areas of: development, immunology, neuroscience, plant biology, structural biology, genomic and computational biology, genome stability and dynamics, chromatin and transcription, RNA, proteins, cellular metabolism, signal transduction, cell cycle, differentiation and death, cell and tissue architecture, membranes and transport, microbiology and pathogens, and molecular biology of disease.

[www.embojournal.org](http://www.embojournal.org)

## EMBO reports

**Editor:** Professor Frank Gannon

12 issues per year

**Impact factor:** 8.175\*

*EMBO reports* is dedicated to covering topics related to biology at a molecular level. Through its four sections: Editorial, Science & Society, Reviews and Scientific Reports, the journal provides a variety of sharply focused and rapidly published short papers and review articles, as well as broader articles reflecting the impact of science on society.

[www.emboreports.org](http://www.emboreports.org)

ISSN: 1469-221X

Published on behalf of the  
European Molecular  
Biology Organization

## Immunology & Cell Biology

**Editor:** Chris R. Parish

8 issues per year

**Impact factor:** 2.482\*

*Immunology & Cell Biology* is an international peer-reviewed journal that focuses on the general functioning of the immune system in its broadest sense, with a particular emphasis on its cell biology. Areas that are covered include:

- Cellular immunology
- Innate and adaptive immunity
- Tumor immunology
- Immunopathology
- Immunotherapy
- Immunogenetics
- Immunological studies in humans and model organisms
- Immune responses to pathogens

*Immunology & Cell Biology* has established an international reputation, built on more than 75 years of innovative publishing. The journal publishes peer-reviewed Original Articles and Short Communications that describe new research results.

[www.nature.com/icb](http://www.nature.com/icb)

## Molecular Systems Biology

**EMBO Editor:** Dr Thomas Lemberger

**Senior Editors:** Ruedi Aebersold, Peer Bork, George Church,

**Impact factor:** 7.941

Leroy Hood and Edison Liu

2 archival print issues per year

*Molecular Systems Biology* is an online open access journal that covers all aspects of the rapidly growing and interdisciplinary field of systems biology at the molecular level.

[www.molecularsystemsbiology.com](http://www.molecularsystemsbiology.com)

ISSN: 1744-4292

Published by NPG in  
partnership with European  
Molecular Biology Organization  
(EMBO).

## FREE online complementary resources include:

cellmigrationgateway

[www.cellmigration.org](http://www.cellmigration.org)

The Cell Migration Gateway is the definitive free online resource for cell migration research, published by the Cell Migration Consortium and Nature Publishing Group.

thesignalinggateway

[www.signaling-gateway.org](http://www.signaling-gateway.org)

The Signaling Gateway is the comprehensive free online resource for cell signaling research. The site now features the Molecule Pages, which provides data on over 3,800 proteins. Expert authored, peer-reviewed information has now been published on nearly 300 molecules.

## OmicsGateway

[www.nature.com/omics](http://www.nature.com/omics)

This is THE portal for all Nature Publishing Group information relevant to large-scale genomics and biology. Whether your interest lies in cancer genomics, glycomics, or systems biology, the Omics Gateway can help you.

All the resources you need have been gathered in one place so that you can quickly and easily access content relevant to your research either by organism or area of interest.

functionalglycomicsgateway

[www.functionalglycomics.org](http://www.functionalglycomics.org)

The Functional Glycomics Gateway is a collaboration between the Consortium for Functional Glycomics and Nature Publishing Group. The Gateway provides the glycobiology research community with important research findings, news and events, and a rich collection of databases.

PathwayInteractionDatabase

<http://pid.nci.nih.gov>

The Pathway Interaction Database, a collaboration between the National Cancer Institute and Nature Publishing Group, is an authoritative, peer-reviewed collection of information about signaling pathways in human cells.
