

Corrigendum

The authors of the following article would like to draw the reader's attention to an omission in the article:

Singh MB, Bhalla PL. Hypoallergenic derivatives of major grass pollen allergens for allergy vaccination. *Immunol. Cell Biol.* 2003; **81**: 86–91.

The mention of deletion mutant of Lol p 1 that shows 3% of the IgE reactivity in this article should have included reference to De Weerd N (2002) Biotechnology of grass pollen allergens for improved hay fever immunotherapy. PhD Thesis, The University of Melbourne, Australia.

The authors apologize for this omission and any confusion it may have caused.
