Thank you
The success of a journal is determined to a large degree by the quality and dedication of reviewers. Editors and Editorial Board members are recognized for their efforts, but the invaluable input of voluntary reviewers is often overlooked. At ISMEJ, we appreciate that reviewing manuscripts can be demanding and time-consuming, especially with typically overcrowded agendas. With this in mind, we wish to recognize the most active non-EB ISMEJ reviewers for their efforts. Many thanks to all our reviewers for their support and input!
