BoneKEy Reports

Serving the international community of researchers and physicians with in-depth coverage on all scientific and clinical aspects of bone health disease.

An online only journal in the field of bone health

Official journal of the International Bone and Mineral Society

www.nature.com/bonekeyreports

BoneKEy Reports is a part of the IBMS BoneKEy platform – an online knowledge resource for the global bone community.

Publishing:
- **Original research** – Articles covering topics from genetics to bone and cancer
- **Reviews** – Insightful and concise over views of the latest research written by leading experts in the field of bone health
- **Commentaries** – An analysis of recently published papers of particular interest.
- **Laboratory Methods** – Step-by-step descriptions of procedures which readers can take to the laboratory or clinic and immediately apply in their own research

Covering:
- Basic science subjects such as bone cell and molecular biology
- Clinical topics including: osteoporosis diagnosis/management, genetics, and biomechanics
Who should read BoneKEy Reports?

BoneKEy Reports is relevant to many departments across an institute, from researchers and physicians in academia, hospitals and other health care settings, and industry with interests in:

- biomechanics and bone biochemistry
- endocrinology
- genetics
- molecular/cell biology
- oncology
- orthopedics
- physiology
- rheumatology

Site license access to BoneKEy Reports provides your users with:

- Original research in the field of bone health
- Commissioned reviews and commentaries written by experts in the bone field, as well as endocrinology, genetics, oncology and rheumatology
- Laboratory Methods, step-by-step descriptions of procedures that users can take to the laboratory or clinic with direct application to their own research
- Integrated searching on nature.com
- Advanced search – search by keyword, author, article title and DOI for refined results
- Enhanced linking and functionality at the article level
